New Urban Spaces Neil Brenner, 2019-05-24 The urban condition is today being radically transformed Urban restructuring is accelerating new urban spaces are being consolidated and new forms of urbanization are crystallizing In New Urban Spaces Neil Brenner argues that understanding these mutations of urban life requires not only concrete research but new theories of urbanization To this end Brenner proposes an approach that breaks with inherited conceptions of the urban as a bounded settlement unit the city or the metropolis and explores the multiscalar constitution and periodic rescaling of the capitalist urban fabric Drawing on critical geopolitical economy and spatialized approaches to state theory Brenner offers a paradigmatic account of how rescaling processes are transforming inherited formations of urban space and their variegated consequences for emergent patterns and pathways of urbanization The book also advances an understanding of critical urban theory as radically revisable key urban concepts must be continually reinvented in relation to the relentlessly mutating worlds of urbanization they aspire to illuminate

Jordan-Zachery,2009-12-30 The control and utilization of urban spaces remains a highly contested issue Much of the debate centers on issues of economic development versus the maintenance and support of already existing communities As a number of urban areas are in the throes of gentrification and economic development projects there is a

dearth of information on not only the use of private power in this process but also the response of the community members This anthology responds to a growing concern about urban and community development and the role of corporate power These essays focus on key themes of land ownership and management community resistance against corporate agendas and public discourse over these issues These themes are presented and developed within an interdisciplinary framework which includes information and commentary about history contemporary politics economic development and ideology Most of the chapters include case studies that provide concrete examples of contemporary developments in urban areas and each chapter includes discussion questions and a list of key words and terms to help guide the reader
