Thinking Socratically Sharon Schwarze,Harvey Lape,1997 A different approach to critical thinking both conceptually and pedagogically Thinking Socratically encourages students in a user friendly way to improve their own natural reasoning skills An enjoyable collection of readings presents students with real life situations that raise questions about the basic assumptions of rationality naturally engaging them in open dialogue the hallmark of the rational person The situations range from the problem of evidence at a trial to the absence of an explanation of why two children died in the same day care center on the same day While the important objectives of more standard texts are not ignored this book goes beyond the usual Thinking Socratically considers topics that are not generally covered by other textbooks such as the advantages of rationality over irrationality the limits of rational thinking the web of belief the values implicit in science the weaknesses of dogmatic and relativistic thinking Thinking Socratically stresses understanding rather than gimmickry and rule memorization

It focuses on the connections between language and the world and what makes statements about the world acceptable or unacceptable This is not an informal logic text but a genuine critical thinking text **Thinking Socratically** Sharon Schwarze, Harvey Lape, 2001 This unique book is an exploration of critical thinking rather than a text of informal logic It emphasizes a philosophical reflection on real issues from everyday life in order to teach readers the skills of critical thinking in a common place context that is easy to understand and certain to be remembered Critical thinking topics are assembled in readings taken from sources including newspapers literature magazines and philosophy These readings compliment the important concepts of critical thinking and provide information on background knowledge the web of belief the limits of evidence the nature of proof and dogmatism and relativism For critical thinkers who need something to think critically about and are willing to see more than just two sides to every argument The Socratic Classroom Sarah Davey Chesters, 2012-09-13 This book provides a framework for a collaborative inquiry based approach to teaching and learning suitable not only for formal educational settings such as the school classroom but for all educational settings For teachers educationalists philosophers and philosophers of education The Socratic Classroom presents a theoretical as well as practical exploration of how philosophy may be adopted in education The Socratic Classroom captures a variety of philosophical approaches to classroom practice that could be broadly described as Socratic in form There is an exploration of three distinct approaches that make significant contributions to classroom practice Matthew Lipman s Community of Inquiry Leonard Nelson s Socratic Dialogue and David Bohm s Dialogue All three models influence what is termed in this book as Socratic pedagogy Socratic pedagogy is multi dimensional and is underpinned by generative evaluative and connective thinking These terms describe the dispositions inherent in thinking through philosophical inquiry This book highlights how philosophy as inquiry can contribute to educational theory and practice while also demonstrating how it can be an effective way to approach teaching and learning Audience This publication is suited to educators teacher educators philosophers of education and philosophers in general It has a theoretical and practical focus making it truly interdisciplinary **Knowledge, Control and Critical Thinking in Singapore** Leonel Lim, 2015-09-07 This book examines how critical thinking is regulated in Singapore through the process of what the influential sociologist of education Basil Bernstein termed pedagogic recontextualization The ability of critical thinking to speak to alternative possibilities and individual autonomy as well as its assumptions of a liberal arrangement of society is problematized in Singapore s socio political climate By examining how such curricular discourses are taken up and enacted in the classrooms of two schools that cater to very different groups in society the book foregrounds the role of traditional high status knowledge in the elaboration of class formation and develops a critical understanding of post developmental state initiatives linked to the parable of modernization in Singapore Knowledge Control and Critical Thinking in Singapore offers chapters on Critical Thinking and the Singapore State Meritocracy Illiberalism and Neoliberalism Sacred Knowledge and Elite Dispositions Recontextualizing Critical Thinking in
