Watching Whales:

Watching Whales & Dolphins in Southern Africa Noel Ashton, 2012-07-11 Southern Africa has some of the best whale and dolphin watching opportunities in the world with over half of the world's species being found in our waters. *Watching Whales Dolphins in Southern Africa* is an essential guide to watching the region's 12 more common species. In addition to species accounts and charts that aid identification, this guide provides detailed information on cetaceans: their evolution, senses, behaviour, classification, and anatomy. Multiple clear images, both photographic and illustrated, help identify each species by showing how to read the partial signs that cetaceans usually offer, such as a flipper, tail, or even just their blow. The book also discusses the tragic toll that hunting has had on whale populations and the ongoing struggle to protect these majestic mammals. This is an invaluable guide for anyone wishing to know more about whales and dolphins of the region.

Whale-watching James Higham, Lars Bejder, Rob Williams, 2014-03-27 A critical insight into the diverse socio-cultural, political, economic, and ecological contexts of the global whale watching industry. *Proceedings of the Workshop to Review and Evaluate Whale Watching Programs and Management Needs*, November 14-16, 1988, Monterey, California, 1989

Guide to Watching Whales in Canada Mimi Breton, Canada. Department of Fisheries and Oceans, 1986 Well illustrated book giving up to date information on the many species of whales found in Canadian waters. Includes full colour identification drawings of the whole whale as well as the parts of the whale that can be seen above water. Includes maps showing distribution.

Marine Protected Areas for Whales, Dolphins, and Porpoises Erich Hoyt, 2012 Erich Hoyt's handbook is an admirable, timely, and highly welcome contribution.

Michael Stachowitsch *Marine Ecology* What does it mean to save the whales if their habitat is left unprotected?

Marine Protected Areas for Whales, Dolphins and Porpoises is the definitive handbook on this pressing issue and the first to bridge the gap between the disciplines of marine protected areas and cetacean conservation. It launches a new chapter in cetacean conservation with its investigation into the crucial habitat needs and protection requirements of some 84 species. The author, one of the world's foremost experts in this field, takes you around the world to investigate the promising results of the latest conservation research and the strategies for obtaining marine protected areas in coastal waters and on the high seas using national legislation and regional and international conventions. This is an essential introduction guide and reference work for those working to ensure a future for whales and dolphins.
