

Morse Watchmans KeyWatcher® Systems Deployed at Australia's Westfield Shopping Centers

Integrated Key Management Solution Features Biometric Authorization

The Westfield name in retail is synonymous with prestigious properties that offer an efficient and dynamic environment for retailers and a quality shopping experience for consumers. With a portfolio of 104 shopping centers globally, Westfield is also a leader in ensuring the protection and safety of staff and contractors in back-of-house and operational areas using state-of-the-art security technology.

Improving Protection and Safety

With thousands of staff and contractors working in the centers across Australia, Westfield management identified a clear need for an efficient and secure system that would allow all workers safe and easier access to and from authorized center locations. To resolve this need, the organization implemented a pioneering key control and management solution with fingerprint biometrics. The system allows pre-approved personnel more streamlined access to and from authorized center locations and provides management with comprehensive monitoring and report functionality.

The solution, developed for Westfield by Blue Glue® and Morse Australia, is based on Morse Watchmans' KeyWatcher® key control and management system, integrated with the NoWAIT (National Work Authorization and Induction Training) fingerprint recognition system.

"Key control and management is an essential element in administering the security aspects of a large retail property."

"Key control and management is an essential element in administering the security aspects of a large retail property."

Alan Jones
Director, BlueGlue P/L

said Alan Jones, Director, BlueGlue P/L. "The integrated solution we devised for Westfield puts together Morse Watchmans' state-of-the-art key control with biometric technology and real-time, centralized remote monitoring for an optimized system to ensure the security of back-of-house and operational areas."

Streamlined Access through Biometrics

Enrollment in the system is through fingerprint identification; a one-time registration allows access at any site in the program with all access activity recorded for auditing purposes. The system additionally issues a durable identification wristband with name, date and time stamp.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of
