**X-Rays From Laser Plasmas** I. C. E. Turcu,J. B. Dance,1999 Soft X rays have great potential for use in a wide variety of applications including the semiconductor industry and the life sciences X Rays from Laser Plasmas Generation and Applications focuses exclusively and in detail on the science and technology of soft X rays produced

with non synchrotron sources Using a minimum of mathematical formulae it discusses how such X rays can be efficiently and economically generated from plasmas produced by lasers and how they interact with matter Authored by Dr Edmond Turcu one of the pioneers in this field X Rays from Laser Plasmas Generation and Applications will be of great interest to a wide variety of readers including all those working in X ray lithography microscopy and radiobiology Soft X-ray Lasers and Applications ,2001 **Laser Science and Technology** A.N. Chester,V.S. Letokhov,S. Martellucci,2012-12-06 The conference Laser Science and Technology was held May 11 19 1987 in Erice Sicily This was the 12th conference organized by the International School of Quantum Electronics under the auspices of the Ettore Majorana Center for Scientific Culture This volume contains both the invited and contributed papers presented at the conference covering current research work in two areas new laser sources and laser applications The operation of the first laser by Dr Theodore Maiman in 1960 initiated a decade of scientific exploration of new laser sources This was followed by the decade of the 1970s which was characterized by technology push in which the discoveries of the 1960s were seeking practical application In the 1980s we are instead seeking applications pull in which the success and rapid maturing of laser applications provides both inspiration and financial resources to stimulate additional work both on laser sources and applications The papers presented in these Proceedings attest to the great vitality of research in both these areas New Laser Sources The papers describe current developments in ultra violet excimer lasers X ray lasers and free electron lasers These new lasers share several characteristics each is a potentially important coherent source each is at a relatively short wavelength below 1 micrometer and each is receiving significant development attention today Scientific and Technical Aerospace Reports ,1994
