## **Stranger Than Science:**

**Stranger Than Science** Frank Edwards, 1983-09      **Stranger Than Science Stories and Facts-Volume Two** Martin K Ettington, 2022-03-30 This book is my second on stranger than science stories and facts The idea is from the book *Stranger Than Science* by Frank Edwards that I read when I was a kid It made a great impression on me since it caused me to be curious about all of the unknown facts in the world In this Volume Two I've gone through my 120 plus books again to find interesting subjects I've either experienced or researched which were not discussed in the first book My goal is to open the eyes of the reader to facts and stories about the unknown they may not know about Hopefully this will lead you to become more open minded and think seriously about new things which may not have been part of your life before Here you will read stories about the Paranormal Spiritual Enlightenment Legendary animals like Dragons giant snakes living dinosaurs ball lightning alien anti gravity technology improving longevity and much more I promise you will not be bored with the materials we cover here After reading this book I hope you can see that our world is truly mysterious and the more we know the more questions we have and the more there is to know      [Science in Wonderland](#) Melanie Keene, 2015-03-26 In Victorian Britain an array of writers captured the excitement of new scientific discoveries and enticed young readers and listeners into learning their secrets by converting introductory explanations into quirky charming and imaginative fairy tales forces could be fairies dinosaurs could be dragons and looking closely at a drop of water revealed a soup of monsters *Science in Wonderland* explores how these stories were presented and read Melanie Keene introduces and analyses a range of Victorian scientific fairy tales from nursery classics such as *The Water Babies* to the little known *Wonderland of Evolution* or the story of insect lecturer *Fairy Know a Bit* In exploring the ways in which authors and translators from Hans Christian Andersen and Edith Nesbit to the pseudonymous A L O E and Acheta Domestica reconciled the differing demands of factual accuracy and fantastical narratives Keene asks why the fairies and their tales were chosen as an appropriate new form for capturing and presenting scientific and technological knowledge to young audiences Such stories she argues were an important way in which authors and audiences criticised communicated and celebrated contemporary scientific ideas practices and objects

[Radionics and Life Force Technologies](#) Martin K. Ettington, *Radionics* is the term for machines which manipulate life forces This is often for healing or increasing psychic perceptions The Author is an engineer and has many decades of experience with the paranormal and well as time learning and experimenting with radionics devices from the 1970s While radionics devices are often considered pseudoscience those opinions don't take into account the sensitivities of individuals who have incredible paranormal and healing abilities In my first year of engineering school at Rensselaer Polytechnic Institute in Troy New York I met a man who became my mentor in the Paranormal and other things too This was in 1973 I learned to meditate and how to open my crown chakra to take in vital forces which allowed me to do many things including healing others In addition I also met another middle aged guy at a Psychic Fair in Saratoga Springs New York He was a

researcher in the arcane field of Kirlian Photography In this book the history of radionics is discussed some of the major influencers on that history how these devices are used for healing and even some plans for building radionics devices My hope is that this book will give you a good grounding in radionics to learn to use it productively for your own efforts

**Accepted Science & Paradigms Which Are Likely Wrong** Martin K. Ettington, As an engineer and student of science I try to keep up with publications of the latest discoveries and paradigm shifts in science around the world I believe that there are several big problems with science today First is that much science is biased which might be because some scientists want to keep their point of view prominent and the others because many focuses of science are supported by biased funding This will be discussed in this book The other issue is that many scientists limit their thinking to only support age old paradigms and refuse to accept changes to their theories or throw out evidence because it doesn't conform their current beliefs In this book we will cover many issues such as the belief among many cosmologists that the Big Bang never happened We will also look at ideas we thought settled but which have lots of contrary evidence and anecdotal counter stories such as time travel and dimensional crossings After you read this book you may question much of what is commonly accepted by scientists in the world today *The Ancient Underground Wall in Rockwall, Texas* Martin K. Ettington, The underground rock wall in Rockwall Texas has fascinated me for years I've read everything I could online about it Recently I moved from Los Angeles to Denton Texas which is only about an hour drive from Rockwall So I went there and spent an hour with the Rockwall County Museum Curator and learned a lot more about the structure Was also able to examine and take pictures of the wall section moved from the actual wall and reconstructed outside the museum In this book I've related the history of the wall's discovery excavations interesting items and structures found on or near the wall and information about possible giants who might have built it There are a lot of unanswered questions about this structure which still need to be learned Those questions are listed near the end of this book **The Fortean Influence on Science Fiction** Tanner F. Boyle, 2020-11-30 Charles Fort was an American researcher from the early twentieth century who cataloged reports of unexplained phenomena he found in newspapers and science journals A minor bestseller with a cult appeal Fort's work was posthumously republished in the pulp science fiction magazine *Astounding Stories* in 1934 His idiosyncratic books fascinated scared and entertained readers many of them authors and editors of science fiction Fort's work prophesied the paranormal mainstays of SF literature to come UFOs poltergeists strange disappearances cryptids ancient mysteries unexplained natural phenomena and everything in between Science fiction authors latched on to Fort's topics and hypotheses as perfect fodder for SF stories Writers like Arthur C Clarke Philip K Dick Robert Heinlein H P Lovecraft and others are examined in this exploration of Fortean science fiction a genre that borrows from the reports and ideas of Fort and others who saw the possible science fictional nature of our reality [The Spiritual Enlightenment of an Engineer](#) Martin K. Ettington, I've written quite a few books about spirituality and my experiences and beliefs in our abilities to expand our consciousness

through spiritual development practices meditation and the paranormal This book includes my experiences with paranormal abilities acquired from the spiritual development process and different enlightenment experiences Having been raised in a technical family and gone to engineering school my perspective is pretty unique since I developed both traditional technical knowledge of the world while I was also going through the spiritual development and enlightenment process There are many engineers and scientists who are also religious but I ve found that technical people who are as deeply into spiritual enlightenment practices and paranormal experiences are pretty rare What I ve found is that this dual background has given me more clarity about the world we live in and better objectivity in many cases regarding strange or unusual phenomena The theme of this book is to review how I went through this dual track system of learning in my life to become both a traditional engineer and to have fairly adept knowledge of spiritual and paranormal experiences

**The Immortals of the Interstellar Colony** Martin K. Ettington, In Part I we learn the story of a young man who lost hope then found it again He learned how to change his life and found a new mission and goals which excited him This led him to a career in space manufacturing which evolved into a project building Habitats in Space There have been a lot of discussions about Space Habitats but how would you actually build one and what technical and personal issues would arise in the process Read about a personal rise from ashes hope and the potential for creating a new wonderful world to live in which is literally out of this world Part II is about converting the Habitats to an interstellar spaceship to settle a new planet It is a long journey with major dangers along the way A generational ship with long lived residents And what new abilities would people develop on a long journey to the stars Follow this adventure to learn the realistic challenges of an Interstellar Journey **Science** ,1925 Vols for 1911 13 contain the Proceedings of the Helminothological Society of Washington ISSN 0018 0120 1st 15th meeting

*Creating Your Own Reality* Martin K. Ettington, There are a lot of books written on the topic of visualization Mine is a little different As an engineer and experiencer of many paranormal events I ve got a different perspective enabled by my research and experience There are many subjects I ve studied that indicate that the mind really can affect our reality In this book I will review why my research and experience says that visualization really works and some lessons on how to do it The Reality we live in is much more malleable than we think and so why not set our goals and purposes to get that reality to work the way we want it Techniques included in this book include various visualization techniques and building your own vision board **Stranger Than Science Stories and Facts** Ettington Martin (author),1901 *Strange Tales from National Parks* Martin K. Ettington, National Parks here and abroad have an unusual number of strange scary and weird activities going on It may be because these areas cover some of the most hidden and still natural and undisturbed locations in the world These parks offer undisturbed areas where man does not intrude normally and many activities can be hidden there The stories in this book are mostly by Park Rangers who spent years in the outback of these parks and tell of their unusual and sometimes very scary experiences I ve divided up these stories mainly by types like missing persons Bigfoot sightings Aliens

and UFOs and more Some experiences are so weird or unusual they were hard to categorize so they are in the chapter titled Random Stories From my own experiences camping the wilderness I know that you need to be prepared for the unexpected All of these stories were reported as true but who is to say what the real truth is
