Abstract: Designers change existing situations with a focus on changing the behavior of artifacts. When designers aim to intentionally change the behaviors of individuals, organizations, or social systems, practitioners use specific approaches. Strategy (strategic design) and futures (design futures) are two alternatives for designers working on complex situations that require intentional change. This paper presents and reports three editions of a course titled Strategic Design Futures that address this type of situation. The course includes a seminar and a project component, which are structured into six design activities: sense-making, participatory visioning, designing futures, designing strategy, participatory evaluation, and design implementation. The course has ambitious goals, and students can only learn initial competencies. After three iterations, the course has focused on participatory visions and designing futures. The initial competencies the course provides are seeds for complex design situations of the real world requiring strategic and futures-oriented design skills.

Keywords: strategic design; design futures; design for change; service design

1. Introduction

As the greater scope of design becomes a familiar topic, concepts like change, transformation, and transitions become central in design discourse. While any design artifact produces a change, designers lack the ability to create, explain, or anticipate change. Design for change needs to be an intentional practice. In general design theory, design practice is fundamentally about change, “changing existing situations into preferred ones” (Simon, 1969, my emphasis). Nonetheless, I argue designers have a narrow vision of change centered on form-giving and satisfying human desire for commercial purposes. Strategy (strategic design) and futures (design futures) are powerful approaches to design for intentional change, considering challenges beyond the configuration of artifacts such as human needs and well-being, organizational culture, social systems, and planetary health. Charles Darwin: The Beagle Letters Charles Darwin, Conrad Martens, 2008-09-04 Charles Darwin's voyage on the HMS Beagle is a gripping adventure story and a turning point in the making of the modern world. Brought together here in chronological order, the letters he wrote and received during his trip provide a first-hand account of a voyage of discovery that was as much personal as intellectual. We follow Darwin's adventures as he prepares for his travels, lands on his first tropical island, watches an earthquake level a city, and learns how to catch ostriches from a running horse. We witness slavery, political revolution, and epidemic disease, and share the otherworldly experience of landing on the Galapagos Islands and collecting specimens. His letters are counterpoised by replies from family and friends that record a comfortable, intimate world back in England. Original watercolours by the ship's artist, Conrad Martens, vividly bring to life Darwin's descriptions of his travels.

Your Stronger Financial Future: The Eight Essential Strategies for Making Profitable Investments Mike Egan, 2011-08-19 Eight simple strategies for getting your retirement portfolio back in shape. Investing is Social Security about to collapse. No, Wall Street is totally corrupt. Nope, the government bailouts benefited only insiders. Absolutely not, the American Dream is dead. Not on your life. Myths, misconceptions, and misinformation perpetuated by politicians, the media, and other self-interested parties can have a devastating effect on your retirement portfolio. After all, if you're working with the wrong information, how can you make the right investing decisions? Mike Egan, a financial advisor for both individuals and corporations, has worked on Wall Street for more than 20 years. He handles millions of dollars at a time. He knows how it all works, and he's here to tell you that a lot of what you hear just isn't true. In *Your Stronger Financial Future*, Egan busts the most powerful myths that are affecting your retirement plans and provides simple but highly effective strategies you can use to start turning your portfolio around today. Egan's eight retirement investing maxims include: Count on Social Security, but make it only part of your overall plan. Identify the inflation-adjusted amount you need at retirement. Get a licensed financial advisor who really understands Wall Street. Maintain your own personal bailout fund. Build savings rather than accrue debt. Use annuities to account for longevity and healthcare. Two things are standing in the way of you and your dream retirement: misconceptions and presumption. Transcending the negative psychology that misdirects your investing performance is easy; you just need the right information and new strategies to replace the old ones. *Your Stronger Financial Future* delivers both. Sometimes changing course midstream is a good thing. Now is the time to reassess your outlook, rethink your finances, and reposition yourself for a stronger financial future.
