Teaching Science In Secondary Schools Reader:

Teaching Science in Secondary Schools Sandra Amos, Richard Boohan, 2013-10-11 A companion to Aspects of Teaching Secondary Science the first section of this reader provides an overview of the key issues discussing the nature of science and its role in the school curriculum The second section goes on to examine critically the ways in which science is reflected in the school curriculum while the third section discusses recent curriculum initiatives and developments Turning the focus from what is taught on to who is taught section four shows that students are very much active learners in the classroom making sense of their experiences and constructing their own meanings The final section covers the role of research in science education giving examples of research papers and considering how productive collaboration between teachers and researchers can impact upon the effectiveness of classroom practice *Teaching Science in Secondary*

Schools Sandra Amos, 2013 **Teaching Science** Matt Cochrane, Tony Liversidge, Bernard Kerfoot, Judith Thomas, 2009-06-16 Reflective practice is at the heart of effective teaching and this book helps you develop into a reflective teacher of science Everything you need is here guidance on developing your analysis and self evaluation skills the knowledge of what you are trying to achieve and why and examples of how experienced teachers deliver successful lessons The book shows you how to plan lessons how to make good use of resources and how to assess pupils progress effectively Each chapter contains points for reflection which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher The book comes with access to a companion website www.sagepub.co.uk/secondary

Language and Literacy in Science Education Jerry Wellington, Jonathan Osborne, 2001-03-16 Science in secondary schools has tended to be viewed mainly as a practical subject and language and literacy in science education have been neglected But learning the language of science is a major part of science education every science lesson is a language lesson and language is a major barrier to most school students in learning science This accessible book explores the main difficulties in the language of science and examines practical ways to aid students in retaining understanding reading speaking and writing scientific language Jerry Wellington and Jonathan Osborne draw together and synthesize current good practice thinking and research in this field They use many practical examples illustrations and tried and tested materials to exemplify principles and to provide guidelines in developing language and literacy in the learning of science They also consider the impact that the growing use of information and communications technology has had and will have on writing reading and information handling in science lessons The authors argue that paying more attention to language in science classrooms is one of the most important acts in improving the quality of science education This is a significant and very readable book for all student and practising secondary school science teachers for science advisers and school mentors Teaching Science in Today's Secondary Schools Walter A. Yarden, Stephen P. Norris, Linda M. Phillips, 2015-03-16 This book specifies the foundation for Adapted Primary Literature APL a novel text genre that enables the learning and teaching of science using research articles that were adapted to the knowledge level of high school students More than 50 years ago J J Schwab suggested that Primary Scientific Articles afford the most authentic unretouched specimens of enquiry that we can obtain and raised for the first time the idea that such articles can be used for enquiry into enquiry This book the first to be published on this topic presents the realization of this vision and shows how the reading and writing of scientific articles can be used for inquiry learning and teaching It provides the origins and theory of APL and examines the concept and its importance It outlines a detailed description of creating and using APL and provides examples for the use of the enactment of APL in classes as well as descriptions of possible future prospects for the implementation of APL Altogether the book lays the foundations for the use of this authentic text genre for the learning and teaching of science in secondary schools

Research in Education, 1968 Second International Handbook of Science Education Barry Fraser, Kenneth Tobin, Campbell J. McRobbie, 2011-12-14 The International Handbook of Science Education is a two volume edition pertaining to the most significant issues in science education It is a follow up to the first Handbook published in 1998 which is seen as the most authoritative resource ever produced in science education The chapters in this edition are reviews of research in science education and retain the strong international flavor of the project It covers the diverse theories and methods that have been a foundation for science education and continue to characterize this field Each section contains a lead chapter that provides an overview and synthesis of the field and related chapters that provide a narrower focus on research and current thinking on the key issues in that field Leading researchers from around the world have participated as authors and consultants to produce a resource that is comprehensive detailed and up to date The chapters provide the most recent and advanced thinking in science education making the Handbook again the most authoritative resource in science education
