Croucher, 2023-09-15 A celebration of the women who furthered computer technology from the nineteenth century to the present day *Working Mother*, 1998-06 The magazine that helps career moms balance their personal and professional lives *Cyberliteracy* Laura J. Gurak, 2008-10-01 divThe Internet has changed our social spaces our political and social realities our use of language and the way we communicate all with breathtaking speed Almost everyone who deals with the Internet and the new world of cyberspace communication at times feels bewildered dismayed or even infuriated In this clear and helpful book computer communications scholar Laura J Gurak takes a close look at the critical issues of online communication and discusses how to become literate in the new mass medium of our era In cyberspace Gurak shows us literacy means much more than knowing how to read Cyberliteracy means being able to sort fact from fiction to detect extremism from reasonable debate and to identify gender bias commercialism imitation parody and other aspects of written language that are problematic in online communication Active reading skills are essential in cyberspace where hoaxes abound advertising masquerades as product information privacy is often compromised and web pages and e mail messages distort the truth Gurak analyzes the new language of the Internet explaining how to prepare for its discourse and protect oneself from its hazards This book will appeal to anyone with an interest in the impact of the Internet on the practices of reading and writing and on our culture in general DIV Macworld, 1997 The Complete Home Learning Sourcebook Rebecca Rupp, 1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level **Everyday Ways to Raise Smart, Strong, Confident Girls** Barbara Littman, 1999-09-18 Offers practical advice to parents concerned about self esteem in their daughters **Down and Out in Silicon Valley** Mel Krantzler, Patricia Biondi Krantzler, 2002-02 Like Icarus flying too close to the sun many once promising dot com entrepreneurs have been burned by overweening ambition and come crashing to the ground Besides the economic wreckage left in the wake of their high flying dreams there is also a good deal of psychological turmoil Psychologists Mel Krantzler and his wife Pat both counselors who have helped hundreds of managers and CEOs of high tech companies cope with dreams turned to nightmares expose the shadowy side of Silicon Valley in this revealing book about the personal costs of success In addition to being a psychologist Dr Krantzler is also a trained economist His economic expertise combined with his psychology practice enables him to uniquely illuminate Silicon Valley s culture from both perspectives This is the first book to explode the romanticized myth of Silicon Valley which is still so prevalent in advertising and the media What you never hear about this Mecca of high tech culture is that it has one of the highest divorce rates in the world more children who are psychologically disturbed than in less affluent areas almost no affordable decent housing even for those earning 50 000 a

year and widespread alcohol and drug use What the Krantzlers make clear is that aside from the simple geographical designation Silicon Valley is the name for a psychological obsession found any place where people believe that instant fame and fortune can be gained through silicon chips and Web sites This dream nourishes itself on an illusion of power and instant gratification And like heroin and cocaine it is highly addictive promising total happiness but often ending in disarray and despair Based on interviews with many Silicon Valley executives who have decided to change their lives to achieve true well being for themselves and their families this book concludes with a formula for real success a well rounded balanced and fully human life
