Kevin Kriger (ed.)

Technology In Student Affairs Ibues Applications And Trends:
    Technology in Student Affairs John L. Baier,Thomas S. Strong,1993-12-31 This book provides a comprehensive guide to technology in student affairs Many student affairs divisions have introduced advanced information and computer technology into their programs in response to the increasing economic constraints facing American colleges and universities today Advanced technology in student affairs can reduce overhead costs and increase output despite personnel reductions This book is designed to assist student affairs practitioners graduate students and graduate preparation program faculty members in applying advanced technology to their own programs Co published with the American College Personnel Association   NMDME 2023 Yau Yuen Yeung,Seifedine Kadry,Guiyun Guan,2024-01-22 This book contains the proceedings of the 3rd International Conference on New Media Development and Modernized Education NMDME 2023 which was held in a hybrid form from October 13th to 15th 2023 The conference topics include Educational Sciences Innovative Applications of Teaching Technology Modernized Vocational Education Digital Media Technology Digital Media Technology and Applications Virtual Technology and Intelligent Media Communication Computational Communication and Smart Media The conference provided a platform for discussing scientific research findings and cutting edge technologies in the fields of new media development and modernized education to encourage collaboration in the industrialization of academic achievements We invited specialists and intellectuals to attend the conference sharing their excellent contributions and perspectives in the speeches We hope that the scientific attitudes and skills developed through research will encourage scholars worldwide to contribute to the development of knowledge generated by research Finally we would like to express our gratitude to the conference chair publication chairs technical program committee chairs local organizing chairs program committee chairs conference secretariat and conference sponsors for their financial support which made the successful organization of NMDME 2023 possible We hope that this conference will continue to be held in the coming years publishing more insightful articles with inspiring research   Reference Services Review ,1973   **Surveillance Education** Nolan Higdon,Allison Butler,2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy

and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education **Business Week** ,1999 Current Index to Journals in Education ,1983 **U.S. News & World Report** ,1985 **Integrating Technology Into Student Affairs (#9 SAPPI Series)** V. Barbara Bush,Hugo A. Garcia,2023-11-27 This book is a valuable resource for graduate students in student affairs preparation programs and anyone working in the field of student affairs It provides readers with a comprehensive guide to the integration of technology in student affairs drawing on the expertise of leading scholars and practitioners in the field The chapters in this book explore the many ways in which technology can be used to enhance student engagement support and learning outcomes The topics include the history of technology in student affairs digital identity integrating high tech with high touch on campus ethical issues with technology technology and risk management consideration of the need for social media liaisons in student affairs technology competency and adaptability and case study on technology decision making Whether you are a seasoned professional or a new practitioner you can gain a wealth of insights on how to use theoretical models to address digital identity convert traditional campus functions to technological approaches apply a conceptual framework for ethical technological practices enhance campus and community engagement through the development of a social media liaison navigate technological competency and adaptability issues on campus as well as to identify legal issues arising in daily practice and learn risk management skills The knowledge skills and wisdom provided in this book will guide you not only to incorporate technology into your work but also empower you to leverage technology in innovative ways to better serve the needs of your students and advance the field of student affairs Library & Information Science Abstracts ,2002 *Chicago Tribune Index* ,2004 Technology and Engagement Heather T. Rowan-Kenyon,Ana M. Martínez Alemán,Mandy Savitz-Romer,2018-02-15 No detailed description available for Technology and Engagement **Technology in Student Affairs** Kevin Kriger (ed.),2005 Increasing Student Engagement and Retention Using Mobile Applications Laura A. Wankel,Patrick Blessinger,2013-01-30 Mobile technologies are reshaping and reframing the practice of teaching and learning in higher education This volume critically examines new research on how mobile technologies and m learning technologies like Skype are being used in higher education to increase learner engagement in an era of increasing globalization and mobility **Using Emerging Technologies to Enhance Student Engagement** ,2008 Today s college students have never known a time when personal computers did not exist They attended K 12 schools where most of their classrooms were equipped with computers Information technology has always been part of their learning process not to mention the impact it has had on the development of their friendships research and writing

skills shopping and choice of college or university to attend They expect that institutions of higher education will respond to their inquiries without delay much in the same way that customer service is handled on the Web Student expectations are driving the creation of live Web chats in house social networking sites university wiki and shared virtual spaces Unfortunately higher education faculty and staff in general and student affairs professionals in particular are behind the curve in their use of information technology from back cover *Digital Technologies in Higher Education* Sarah Guri-Rozenblit,2009 Technology affects nowadays practically most activities in our life The new digital technologies have permeated economy markets politics our workplaces the ways we communicate with each other our home activities as well as operation of all levels of education from kindergarten to doctoral studies The impact of the new technologies has changed the speed of production and distribution of knowledge as evidenced by the increased publications of scientific papers and the number of patent applications The new technologies challenge higher education institutions world wide to redefine their student constituencies their partners and competitors and to redesign their research infrastructures and teaching practices The digital technologies have also generated many conflicting claims and predictions as to the present and mainly future effects that Internet and World Wide Web might have on higher education environments Some futurists tell us that the information and communication technologies have already produced an era of a digital tsunami and are driving the restructuring of academe by forcing educators to realign and redesign their academic work dramatically while many others contend that the use of technology has remained and will remain on the margins of the academic activities and is unlikely to change in any fundamental way the dominant campus cultures On one hand the emergence of the new technologies has broadened access to many new student clienteles and in such a way contributed greatly to social equity in higher education and on the other hand the continuous development of advanced and complex technological infrastructures widens the digital divide between developed and developing countries and between rich and poor Most academics have adopted eagerly the many technological capabilities provided by the Internet in their research activities and at the same time many professors still feel reluctant to incorporate the technologies in their teaching The digital technologies gave rise to many new providers of higher education and increased the competition in the academic global market and at the same time we witness a growing trend of collaborations and convergence of academic practices enhanced by the new media The World Wide Web encouraged digital piracy and led to the enactment of stringent copyright and other intellectual property laws while concurrently has enhanced an open source movement that advocates the opening up of academic work and research to the public   The Use of Computers in Student Affairs Steven L. Stelter,1980   **The Impact of Information Technology in Student Affairs and Services** Bruce Belbin,2000   **Online and Engaged** Stephanie Smith Budhai,2020-03 Nearly a third of all college students are enrolled in at least one online course and that number continues to grow Meeting students where they are means bringing student services and supports to online learners by creating innovative ways to carry out traditional student

affairs functions This book shares best practices case studies examples experiences and ideas for supporting online learners through their college experience The first section focuses on preparing for the everchanging higher education landscape and situating student affairs in the 21st century The authors address how to support learners taking hybrid and fully online courses within virtual learning environments and how to educate and support 21st century students The second section focuses on the paradigm shift needed to bring traditional student affairs work to the online environment The authors address how individual functional areas within student affairs can provide services and supports to students who take their courses 100% online and to traditional on campus students who take online courses The third and final section explores leveraging technology to advance the work of student affairs for online learners Tools discussed include learning management systems virtual conferencing systems online integrative cocurricular programming digital badging and virtual learning communities

Advancing Higher Education with Mobile Learning Technologies: Cases, Trends, and Inquiry-Based Methods Keengwe, Jared,Maxfield, Marian B.,2014-07-31 This book examines the implementation and success of mobile digital learning tools with the inclusion of data on specific learning environments enhanced by ubiquitous educational technologies Provided by publisher   Digital Technology as Affordance and Barrier in Higher Education Maura A. Smale,Mariana Regalado,2016-12-15 This book explores college students lived experiences of using digital technologies for their academic work Access to and use of digital technologies is an integral aspect of higher education in the twenty first century However despite the tech savvy image of them propagated by the media not all college students own and use technology to the same extent To ensure that students have the best opportunities for success all in higher education must consider ways to increase affordances and reduce barriers in student technology use This book explicitly examines urban commuter students use of digital technologies for academic work on and off campus
