The Technology Trap Carl Benedikt Frey, 2019-06-18 Made me look at the industrial revolution invention sleeping beauties contexts and the forces that shape our societies differently David Byrne New York Times Book Review How the history of technological revolutions can help us better understand economic and political polarization in the age of automation From the Industrial Revolution to the age of artificial intelligence The Technology Trap takes a sweeping look at the history of technological progress and how it has radically shifted the distribution of economic and political power among society's members As Carl Benedikt Frey shows the Industrial Revolution created unprecedented wealth and prosperity over the long run but the immediate consequences of mechanization were devastating for large swaths of the population Middle income jobs withered wages stagnated the labor share of income fell profits surged and economic inequality skyrocketed These trends Frey documents broadly mirror those in our current age of automation which began with the Computer Revolution Just as the Industrial Revolution eventually brought about extraordinary benefits for society artificial intelligence systems have the potential to do the same But Frey argues that this depends on how the short term is managed In the nineteenth century workers violently expressed their concerns over machines taking their jobs The Luddite uprisings joined a long wave of machinery riots that swept across Europe and China Today's despairing middle class has not resorted to physical force but their frustration has led to rising populism and the increasing fragmentation of society As middle class jobs continue to come under pressure there's no assurance that positive attitudes to technology will persist The Industrial Revolution was a defining moment in history but few grasped its enormous consequences at the time The Technology Trap demonstrates that in the midst of another technological revolution the lessons of the past can help us to more effectively face the present

Time Traps Todd Duncan, 2010-12-07 Sales quotas stress filled days and long working hours fill the schedules of salespeople everywhere In Time Traps author Todd Duncan teaches readers that this formula is all wrong and proclaims that it's possible to achieve more sales success with less stress earn more family time with less frustration and gain more money without investing life consuming hours at work The key he shares is not time management after all managing time is an impossible task to undertake Instead he shows readers how to manage what they do with the time they're given Highly acclaimed by some of the biggest names in the business sales and leadership industries including bestselling authors Stephen R Covey and John C Maxwell Time Traps includes tips for balancing and maximizing time saying no more often leveraging time saving tools and technology and prioritizing life amid professional chaos More than that the book explains why these things are so important in the first place and how allowing time for one thing can actually produce more output not less in other areas of your life Research shows that as much as 75 percent of the time people spend at work is a waste of that valuable time used for menial tasks rather than making sales This straightforward and actionable guide will help you break out of this statistic so you can propel your career and your life to new heights starting right now *Business*

[Structural Transformation in South Africa](#) Antonio Andreoni, Pamela Mondliwa, Simon Roberts, Fiona Tregenna, 2021-07-15 Taking South Africa as an important case study of the challenges of structural transformation Structural Transformation in South Africa offers a new micro meso level framework and evidence linking country specific and global dynamics of change with a focus on the current challenges and opportunities faced by middle income countries Detailed analyses of industry groupings and interests in South Africa reveal the complex set of interlocking country specific factors which have hampered structural transformation over several decades but also the emerging productive areas and opportunities for structural change The structural transformation trajectory of South Africa presents a unique country case given its industrial structure concentration and highly internationalized economy as well as the objective of black economic empowerment Structural Transformation in South Africa links these micro meso dynamics to global forces driving economic institutional and social change This include digital industrialization global value chain consolidation financialization environmental and other sustainability challenges which are reshaping structural

transformation dynamics across middle income countries like South Africa While these new drivers of change are disrupting existing industries and interests in some areas in others they are reinforcing existing trends and configurations of power The book analyses the ways in which both the domestic and global drivers of structural transformation shape and in some cases are shaped by a country s political settlement and its evolution By focusing on the political economy of structural transformation the book disentangles the specific dynamics underlying the South African experience of the middle income country conundrum In so doing it brings to light the broader challenges faced by similar countries in achieving structural transformation via industrial policies
