Primary Targets are those who have been placed on the hit list marked for the slow kill and are being heavily targeted 24/7 in intentional physical and psychological torture programs using remotely directed microwave energy weapons which are also termed psychotronic in a decisive manner to covertly technologically reduce a lifespan. The overall structure of this program is to destroy every aspect of the target's life mentally and physically by using technology to create systematic tissue and organ damage, mental illness resulting from the deployment of the focused directional beam relentlessly over a period of time. Victims who end up at this level in this program are often those who begin to realize what is happening and by their exposure become a threat. The Program does not just stop with primaries. In the full spectrum of this ruthless testing program, Ordinary Victimized Individuals are people who have been unsuspectingly put on a list to be either experimented on, destroyed, or mind controlled with remote frequencies. Women said to be 70% of those targeted fit this category. This is especially true when single and living alone and reportedly are also being sexually exploited by patented stimulation beams. It is all done quietly, covertly, secretly, and it's strategic and slyly orchestrated. Without public awareness through mainstream media on Gag Orders exposing these crimes, victims have no real help when it is military and unified law enforcement. The torture then results in microwave COINTELPRO Covert Technological Murder by the Pain Ray Beam. The weapons are portable, handheld, also and defined in the Space Preservation Act of 2001, Sec 7, and make the perfect official crime.

Wisdom for the Journey Don Jones, 2007-07. This book discusses the process of investigating and analyzing electronic equipment, detecting devices, wireless signals, and the prosecution and prevention of high-tech crime. The coauthors are from private industry and academia and really provide a wide variety of perspectives on the detection of electronic eavesdropping devices, wiretaps, various electronic signals, and the collection and examination of information from laptops, desktop computers, and PDAs. Kenneth Bruno does an excellent job teaching the reader about all the equipment used in electronic eavesdropping detection. We also introduce the reader to various pieces of electronic equipment used to detect

and identify explosives biochemical weapons as well as historic unexploded ordinance The reader is also introduced to the legal system by Mr Joel Liebesfeld who does corporate investigations and is often employed by clients who are in the legal profession or insurance industry Mr Joel Liebesfeld and Dr Doherty discuss the process of becoming an expert witness who may testify to what was found using scientific methods in combination with electronic signal detection or computer forensic equipment We hope that the readership of the book will include high school students considering a career in private industry law enforcement intelligence agencies or the military A background in electronics math and computer science is helpful but not necessary in reading this book Lockard s Principle of Exchange specifies that two objects or people that come in contact with each other will change We hope that this book changes you by increasing your understanding of electronic devices investigation and the justice system
