## **The Scorecard:**

*The Scorecard Solution* Dan King, 2015-01-14 There is no such thing as a healthy plateau In today's high pressure environment simply making the numbers is no longer enough to remain competitive Instead exceeding expectations raising the already high bar and achieving more than others thought possible is the new path toward sustaining success But doing so is certainly easier said than done It requires a clear and objective view of the business and the ability to analyze appropriately the dimensions of talent strategy and execution in order to produce a baseline score to work from Knowing that even the most courageous and objective leader can't steer a ship in the dark The Scorecard Solution is the solution for getting one started on this necessary task for every company's long lasting success By learning how to use a data centric tool the Organizational Prowess Scorecard™ that precisely measures the capabilities needed for sustainable growth readers will then understand better how to Position the organization to meet ambitious goals Bring strategies to life through an execution framework Design a dashboard to track progress and flag problems Foster a winning culture And more Is your enterprise Agile Resilient Vulnerable Lagging This invaluable one of a kind resource gives you the answers you need so that you can chart your company's course for rapid change and outperform the competition every time

Robert S. Kaplan, David P. Norton, 1996 Here is the book by the recognized architects of the Balanced Scorecard that shows how managers can use this revolutionary tool to mobilize their people to fulfill the company's mission More than just a measurement system the Balanced Scorecard is a management system that can channel the energies abilities and specific knowledge held by people throughout the organization toward achieving long term strategic goals Kaplan and Norton demonstrate how senior executives in industries such as banking oil insurance and retailing are using the Balanced Scorecard both to guide current performance and to target future performance They show how to use measures in four categories financial performance customer knowledge internal business processes and learning and growth to align individual organizational and cross departmental initiatives and to identify entirely new processes for meeting customer and shareholder objectives The authors also reveal how to use the Balanced Scorecard as a robust learning system for testing gaining feedback on and updating the organization's strategy Finally they walk through the steps that managers in any company can use to build their own Balanced Scorecard The Balanced Scorecard provides the management system for companies to invest in the long term in customers in employees in new product development and in systems rather than managing the bottom line to pump up short term earnings It will change the way you measure and manage your business
