Horizons of Phenomenology Jeff Yoshimi, Philip Walsh, Patrick Londen, 2023-04-11 This is an open access book which explores phenomenology as both an exceptionally diverse movement in philosophy as well as an active research method that crosses disciplinary boundaries The volume brings together lively overviews of major areas and schools of phenomenology as well as the most recent applications across a range of fields The first part reviews the state of the art in various areas of contemporary phenomenology including several distinct schools of Husserl and Heidegger scholarship as well as approaches derived from Merleau-Ponty, de Beauvoir, Fanon and others An innovative quantitative analysis of citation networks provides rich visualizations of the field as a whole The second part showcases phenomenology as a living discipline that can advance research in other areas While some areas of interaction between phenomenology and other disciplines are by now well established e.g. cognitive science this volume sheds light on newer areas of application The goal is to move beyond discussions of philosophical method and highlight scholars who are actually doing phenomenology in a variety of areas including Embodiment and questions of gender, race and identity The arts, visual art, literature, architecture and Archaeology and anthropology This volume offers a concise introduction to cutting edge phenomenological research and is suitable for both students and specialists

Basics of Perception in Architecture Jörg Kurt Grütter, 2020-10-14 This book makes the extremely complex process of architectural perception far more transparent and thus contributes to a better understanding of our built environment Why is there so much debate about the appearance of our built environment about the aesthetics of architecture today Why do opinions about the aesthetic quality of buildings often diverge extremely even among experts Why can't we agree on architecture on what is beautiful and what is not Most areas of construction such as statics and building

physics are measurable and can therefore be substantiated with objective arguments Yet this does not apply to the unquantifiable aesthetics of architecture Accordingly judgments on aesthetics are always subject specific and strongly dependent on the viewer Nevertheless the aesthetics of architecture is not just a matter of taste Many relationships between buildings as objects and viewers as subjects can be determined objectively with the help of perceptual psychology and information theory as this book demonstrates *Architecture and Visual Perception* Alice Gray Read, Peter C. Doo, Joseph Burton, 1983

Urban Resilience, Livability, and Climate Adaptation Ilaria Pigliatile, Cristina Piselli, Hirushie Pramuditha Karunathilake, Claudia Fabiani, 2024-06-30 This book explores urban environments and their impact on resilience livability climate adaptation health and societal well being It provides interdisciplinary insights for fostering resilient livable and sustainable cities prioritizing well being and quality of life for all residents The book covers various topics and discusses innovative approaches for incorporating nature into urban planning It also examines the relationships between diet diversity food environments and transportation systems Spatial analysis of noise contour maps based on traffic speed is conducted along with an assessment of the impact of office environments on productivity The book explores the influence of streetscapes on anxiety envisions future cities from a youth perspective and identifies critical factors affecting the design and use of elevated urban spaces Daylighting performance in school expansions is evaluated and the concept of a livable city is examined Community adaptive capacity for climate resilient development is assessed through a case study analysis The livability of street vendors in different urban contexts is compared and alternative perspectives on restorative environments are presented The book investigates the impact of urban refugees on cities and reevaluates scientific theories for human well being oriented built environments It evaluates tourist satisfaction with urban railway systems and explores sport as a tool for healthy and sustainable cities *Envisioning Architecture* Eugenio Morello, Barbara E. A. Piga, 2013

Daylighting in Architecture Nick V. Baker, A. Fanchiotti, K. Steemers, 2015-12-08 Typically one third of the energy used in many buildings may be consumed by electric lighting Good daylighting design can reduce electricity consumption for lighting and improve standards of visual comfort health and amenity for the occupants As the only comprehensive text on the subject written in the last decade the book will be welcomed by all architects and building services engineers interested in good daylighting design The book is based on the work of 25 experts from all parts of Europe who have collected evaluated and developed the material under the auspices of the European Commission's Solar Energy and Energy Conservation R D Programmes *The Built Environment* Wendy R. McClure, Tom J. Bartuska, 2011-09-09 This book takes a sweeping view of the ways we build things beginning at the scale of products and interiors to that of regions and global systems In doing so it answers questions on how we effect and are affected by our environment and explores how components of what we make from products buildings and cities are interrelated and why designers and planners must consider these connections

Contextualism in Architecture Azza Mohamed Eleishe, 1994

The Covert Life of Hospital Architecture Julie Zook, Kerstin

Sailer, 2022-03-22 *The Covert Life of Hospital Architecture* addresses hospital architecture as a set of interlocked overlapping spatial and social conditions. It identifies ways that planned for and latent functions of hospital spaces work jointly to produce desired outcomes such as greater patient safety, increased scope for care provider communication, and more intelligible corridors. By advancing space syntax theory and methods, the volume brings together emerging research on hospital environments. Opening with a description of hospital architecture that emphasizes everyday relations, the sequence of chapters takes an unusually comprehensive view that pairs spaces and occupants in hospitals: the patient room and its intervisibility with adjacent spaces, care teams, and on-ward support for their work, and the intelligibility of public circulation spaces for visitors. The final chapter moves outside the hospital to describe the current healthcare crisis of the global pandemic as it reveals how healthcare institutions must evolve to be adaptable in entirely new ways. Reflective essays by practicing designers follow each chapter, bringing perspectives from professional practice into the discussion. *The Covert Life of Hospital Architecture* makes the case that latent dimensions of space as experienced have a surprisingly strong link to measurable outcomes, providing new insights into how to better design hospitals through principles that have been tested empirically. It will become a reference for healthcare planners, designers, architects, and administrators, as well as for readers from sociology, psychology, and other areas of the social sciences.
