Understanding Amae:

Japanese Understanding of Salvation Martin Heißwolf, 2018-02-14 It is no secret that Christianity has been widely rejected in Japan with less than two percent of the population identifying as Christian. The dominant worldview in Japan is deeply animistic with beliefs such as the Japanese mana concept, the Japanese soul concept, and the concept of God (kami) being deeply rooted in the culture and fundamentally influencing society. Dr. Martin Heißwolf, with his years of experience in Japan, critically examines Japanese animism in light of core Christian beliefs such as the concepts of peace and salvation. Central to Japanese people's rejection of Christian truth is the diametric opposition of its supernatural message to the natural focus of Japanese animistic folk religion. Heißwolf's meticulous study is framed squarely within missiological thought and praxis, so Christians serving in Japanese contexts are better able to communicate the message of the gospel by more fully understanding Japanese people, people by whom God wants to be known.

Japanese Culture and Behavior

Mother-Texts Julie Kelso, Marie Porter, 2010-07-12 Every day human beings tell and are told stories sometimes in obvious ways sometimes not Most of our communication with each other direct or indirect involves narrative production and reception Narrative is constitutive of human being However whose narratives are heard Feminists argue that the relations between language knowledge gender and power particularly the question as to whether man made and controlled language is a material fit to receive and convey woman s stories are critical issues because historically patriarchy has worked to silence women s dialogue Male knowledge unsurprisingly created and continues to create unrepresentative maternal narratives which lead to unreal expectations of mothers and motherwork It is therefore disconcertingly significant for mothers that neither mothers nor their motherwork have been considered worthy of historical record nor are historical records usually written from a mother s perspective Hence the narrative research in this book which gives recognition to motherhood mothers and or the work they do is valuable It adds to the rapidly accumulating maternal research research that is now available for the historical record Mothers are speaking up developing a canon of literature research narrated in maternal language and claiming maternal knowledge and power
