Understanding Pictures:

Understanding Pictures Dominic Lopes, 1996-03-28 There is not one but many ways to picture the world Australian x ray pictures cubist collages Amerindian split style figures and pictures in two point perspective each draw attention to different features of what they represent The premise of Understanding Pictures is that this diversity is the central fact with which a theory of figurative pictures must reckon Lopes argues that identifying pictures subjects is akin to recognizing objects whose appearances have changed over time He develops a schema for categorizing the different ways pictures represent the different kinds of meaning they have and he contends that depiction s epistemic value lies in its representational diversity He also offers a novel account of the phenomenology of pictorial experience comparing pictures to visual prostheses like mirrors and binoculars The book concludes with a discussion of works of art which have made pictorial meaning their theme demonstrating the importance of the issues this book raises for understanding the aesthetics of pictures

Understanding Pictures Dominic Lopes, 1996 Examining the kinds of visual and cultural skills viewers need to have to understand pictures the author explains why pictures can be understood outwith their cultural and historical context as well as how visual images can convey messages other forms of media cannot

Origins of Pictures Klaus Sachs-Hombach, Jörg R. J. Schirra, 2014-10-29 Anyone talking about pictures by necessity refers to those using pictures It is therefore essentially the competence of using pictures that has to be considered Such competence is not common among higher developed mammals at least as far as we know today This fact raises the question whether and to what extent that ability has to be conceived as a strictly anthropological one In an interdisciplinary approach the first international conference of the Society for Interdisciplinary Image Science GiB titled Origins of Pictures has taken a closer look at the role of pictures for the conditio humana The primary goal of the conference was to present empirical findings of the origins of picture uses considering in particular research in paleo anthropology archeology cultural anthropology and developmental psychology Furthermore those findings were to be related to philosophical considerations concerning the conditions of the conceptual formation of picture competence
