and sometimes even dangerous Dealing with issues such as tobacco consumption global warming and Intelligent Design and a host of pseudoscientific pursuits like UFOs ghosts and the afterlife Media Mediocrity examines how television producers pursuit of ratings and profit trump any desire to provide the audience with an accurate knowledge of science and argues that there are real consequences for this lack of knowledge Four out of five viewers gather the bulk of their scientific knowledge from television making television an important intermediary between society and its understanding of science If television gives us misleading or blatantly false scientific information how can we hope to make informed decisions about scientific issues Equally importantly who is it that is feeding us this false science And what do they gain from doing so If you think your TV has made you an expert then read this book and think again News Releases ,1976 WASH ,1973
