## **Upper Atmosphere 2nd Edition:**

The Upper Atmosphere ... Second Edition Sisir Kumar MITRA (Physicist.), 1952      **The Upper Atmosphere** Richard A. Craig, 2016-06-03 The Upper Atmosphere Meteorology and Physics focuses on the study of the characteristics movements composition and observations of the upper atmosphere The book first offers information on the meteorological conditions in the lower stratosphere and the structure and circulation of the upper stratosphere and the mesosphere Topics include balloon sounding systems climatology of the lower stratosphere disturbed circulation of the lower stratosphere rocket measurements and frequent measurements with balloons and meteorological rockets The text then ponders on the sun s radiation and the upper atmosphere and composition of the stratosphere and mesosphere The manuscript elaborates on the composition and structure of the thermosphere including photochemical processes diffusion composition and structure measurements and structure of the thermosphere The text also ponders on radiative processes and heat transfer atmospheric tides and winds in the lower thermosphere and transport of properties in the upper atmosphere The publication is a valuable source of information for readers interested in the meteorology and physics of the upper atmosphere      **Methods and Results of Upper Atmosphere Research** Joseph A. Kaplan, 1955      **Structure and Dynamics of the Upper Atmosphere** Franco Verniani, 1974      **On the Heating of the Polar Upper Atmosphere** Kaichi Maeda, 1962 On the basis of the atmospheric composition given by F S Johnson in 1960 the contribution of auroral particles to the dissociation of oxygen molecules in the polar upper atmosphere is investigated The maximum rate coefficients are  $4 \times 10^{-8} \text{ cm}^3 \text{ sec}^{-1}$  and  $2 \times 10^{-8} \text{ cm}^3 \text{ sec}^{-1}$  for protons of energy spectrum  $E \geq 8 \text{ dE}$  and for electrons of energy spectrum  $E \geq 4 \text{ dE}$  respectively The height of maximum dissociation is around 90 km both for protons and electrons The heating of the polar mesosphere by exothermic association of the oxygen atoms intensified by the subsidence of the upper polar atmosphere during the polar night is calculated and found to be close to the estimate given by W W Kellogg in 1961 The investigation indicates however that Kellogg s estimate should be reduced slightly to allow for the cooling effect produced by far infrared emission from atomic oxygen in the upper atmosphere Page i      *Geophysik III / Geophysics III* J. Hartmann, Reinhart Leitinger, 2012-12-06 Especially due to the increasing environmental problems there is a need to collect as many data as possible in the upper atmosphere This book serves as a general multidisciplinary guide and introduction for a more effective use of the large amount of now available data from the Earth s atmosphere It also shows the problems of the use of large amounts of time series data for basic science as well as for environmental monitoring and the related information systems The book is aimed for scientists and students interested in the Earth s atmosphere which is vital for the understanding of
