Urban Roar Jordan Lacey,2022-02-10 Urban Roar argues for the existence of autonomous affectivities that roar beneath the din of the urban seeking the attention of us humans so captured by the environments of our own making In hearing the urban roar it is the mythic intention of this book to discover ways in which we can work with the intensities of more than human forces to vitalize our cities The book explores methods by which artists particularly those sound artists involved in fieldwork practices might encounter and translate autonomous affectivities between different environments Of particular interest is Jung s concept of synchronicity and its relationship to artistic creation as experience flow and catalyst in manifesting autonomous affectivities into diverse and affective environments The book makes use of both theoretical and practical approaches from a study of scholarship through which it is argued that an autonomous affectivity is equivalent to an archetype via Jung and an essence via Deleuze s reading of Spinoza to theoretical considerations of the situated body in everyday contexts to practical study of an artistic research experiment designed to reveal and index autonomous affectivities encountered during fieldwork practices for the purpose of influencing urban design interventions In this fresh analysis Lacey reveals the possibilities in urban environments

Digital Media in Urban China Wilfred Yang Wang,2019-10-04 This book examines the use and culture of digital media in Chinese cities By examining examples and data from Chinese and global social media platforms the book argues that digital media facilitate Chinese people s sense of local self and local identity In doing so the book moves on from the polarised debate regarding the democratic function of Chinese internet to instead examine the connection between digital technologies and the country s history culture and eventually people and their everyday lives It offers a rich analysis of a Chinese city in the digital age and challenges the nationalistic approach to study China s digital media culture
