Urban Space And Structures:

Urban Space and Structures Lionel March, 1975-05-29 This is a digitally reprinted edition of *Urban Space and Structures* first published in 1972 This first volume in the Cambridge Urban and Architectural Studies series is a compilation outlining the growth of a particular line of research work which was taking place at the Centre for Land Use and Built Form Studies in Cambridge at the time It attempted to understand some of the factors which at a theoretical level condition the range of choices that are available whether in a building the nodal point in a city or the complete urban system *The Routledge Handbook of Architecture, Urban Space and Politics, Volume I* Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license Hell's Kitchen and the Battle for Urban Space Joseph J. Varga, 2013-05-01 Hell's Kitchen is among Manhattan's most storied and studied neighborhoods A working class district situated next to the West Side's middle and upper class residential districts it has long attracted the focus of artists and urban planners writers and reformers Now Joseph Varga takes us on a tour of Hell's Kitchen with an eye toward what we usually take for granted space and particularly how urban spaces are produced controlled and contested by different class and political forces Varga examines events and locations in a crucial period in the formation of the Hell's Kitchen neighborhood the Progressive Era and describes how reformers sought to shape the behavior and experiences of its inhabitants by manipulating the built environment But those inhabitants had plans of their own and

thus ensued a struggle over the very spaces public and private commercial and personal in which they lived Varga insightfully considers the interactions between human actors the built environment and the natural landscape and suggests how the production of and struggle over space influence what we think and how we live In the process he raises incisive questions about the meaning of community citizenship and democracy itself Form Finding Through Methodology Clarence D. Olsen,2016 **Building Resilient Cities in China: The Nexus between Planning and Science** Xueming Chen,Qisheng Pan,2015-05-20 This book discusses a range of planning and management issues related to building urban resiliency It covers such topics as urban environmental and transportation planning historical preservation emergency relief and management geographic information systems GIS and other technological applications The book includes case studies of several cities and districts in China including Shanghai and a number of cities in the United States of America Urban resiliency in the face of uncertainty is a priority for planning and governance in communities worldwide In China which has suffered many of the world s most devastating floods earthquakes and typhoons preparing for the threat of disaster has long been an important planning objective Recent calamities such as the 2008 Winter Storms the 2008 Wenchuan Earthquake and the 2012 Beijing Floods have only made planning for resiliency more urgent As planners work to prepare for such events interdisciplinary collaboration becomes increasingly important Planners need the tools and insights offered by other fields including both the natural and social sciences At the same time these interdisciplinary relationships help shape the identity of urban rural planning in its new role as one of China s primary academic disciplines Thus the nexus between planning and science is critically important in building resilient cities in China and the Chinese planning experience can serve as an example to and benefit countries around the world *Design of Urban Space* Ali Madanipour,1996-11-18 Madanipour draws together the major themes in urban design today uncertainty regarding nature and scope increased demand for courses in urban design and increased demand for research into the subject *Urban Space and Structure* ,1972 *Mapping Spatial Relations, Their Perceptions and Dynamics* Susanne Rau,Ekkehard Schönherr,2013-12-13 This book is the product of an eponymous workshop which took place in Erfurt in May 2012 and which has since then been supplemented with four further contributions The topics focus on the potential mapping of perceived urban space and spatial hierarchies as a consequence of social usage undertaken by a variety of active participants together with spatio temporal changes as a result of factors such as demographic urban growth and decline Historians cartographers and geographers are brought together to present and discuss different models ideas and new methods of spatial analysis and modes of representing changes in perceptions The two main subjects are the epistemology of spatial change and the question of historical media and adequate presentation This work represents a first step toward the development of a new model for mapping urban changes and spatial relations concerning the past present and future **Frontiers of Green Building, Materials and Civil Engineering III** Jimmy Chih Ming Kao,Wen Pei Sung,Ran Chen,2013-08-30 Selected peer reviewed papers from the Second International

Conference on Green Building Materials and Civil Engineering GBMCE 2013 August 21-23 2013 Taiwan *Time, Space, and Society* A. Kellerman, 1989-02-28 Time and space are two of the most basic dimensions of human life They envelop all human beings from birth to death As such they provide the context for human existence At the same time however time and space also serve as major influencing factors in mankind's actions Hence a vast literature has developed on time and space as separate dimensions and recently on time space as joint dimensions Interestingly enough the social connotations of time and space have mostly been studied with the individual human being in mind The more societal significance of time and space whether separately or jointly have been relatively neglected It is the purpose of this volume to help fill this lacuna through discussions on some of the many junctions of time space and society at large The discussion will naturally involve concepts and findings from more than just one discipline notably geography sociology social history and political science It is thus obvious that the topic may be highlighted from several perspectives Given my own education and work the approach will lean more to the geographical perspective Geography has a special merit as an integrating framework for the study of time space and society It is a discipline that has space at the center of its raison d'être and as such has always striven for integration holism and comprehensiveness
