Voluntary Euthanasia

Sheila A. M. McLean

Voluntary Euthanasia:

Voluntary Euthanasia and the Common Law Margaret Otlowski, 1997 Margaret Otlowski investigates the complex and controversial issue of active voluntary euthanasia. She critically examines the criminal law prohibition of medically administered active voluntary euthanasia in common law jurisdictions and carefully looks at the situation as handled in practice. The evidence of patient demands for active euthanasia and the willingness of some doctors to respond to patients' requests is explored, and an argument for reform of the law is made with reference to the position in the Netherlands where active voluntary euthanasia is now openly practiced. [The Encyclopedia of Libertarianism](#) Ronald Hamowy, 2008-08-15 Provides an introduction to and compendium of libertarian scholarship via a series of brief articles on the historical, sociological, and economic aspects of libertarianism within the broader context. [Ethical Studies](#) Robert A. Bowie, 2004 A detailed treatment of ethics preparing students for the methods of study expected in higher education. Covering the major western theories and their religious connections as well as a series of pertinent contemporary ethical issues. This second edition has been substantially updated to provide comprehensive coverage of the Religious Ethics requirements of all major awarding bodies. [Bioethics](#) Megan-Jane Johnstone, 2015-11-20 An essential resource for both undergraduate and postgraduate students and registered nurses to develop new insights and moral wisdom around ethical issues they will face in clinical practice. *Bioethics: A Nursing Perspective* 6th Edition continues to set the standard for bioethical issues in nursing practice. As with previous editions, this highly respected text provides a comprehensive framework to assist students and registered nurses to understand the ethical challenges, obligations, and responsibilities they will encounter in daily practice. Greater depth on ethical issues, particularly those concerned with ethical conduct, unprofessional conduct, and professional misconduct and morality politics. Case scenarios and critical questions to encourage students and registered nurses to reflect on key issues that relate to their own practice. New chapters: Ethics, dehumanisation, and vulnerable populations; Professional obligations to report harmful behaviours with a focus on impaired practitioners; child abuse and elder abuse. Introduces a new concept: cultural humility. Content on needs versus wants, the right not to be informed, palliative sedation, preventing ethical conflicts, the relationship between professional judgment and moral decision making in nursing and health care contexts, and future ethical difficulties concerned with climate change, peak oil, pandemic influenza, antimicrobial resistance, and health inequalities. All chapters and references have been updated to reflect contemporary nursing practice, locally and globally. [A Companion to Applied Ethics](#) R. G.
