Nonprofit Sector Burton Allen Weisbrod, 1977 **Involuntary Action** Robert Whelan, 2000-05-31 Voluntary action is an important component of a free society It is part of what Friedrich Hayek called the third or independent sector distinct from the state on the one hand and the market on the other However Robert Whelan argues that the voluntary sector today has allowed itself to be fatally compromised by its involvement with the state Many charities derive a large part of their income from government They have exchanged their independence for taxpayers money since in a state funded voluntary sector the state determines the scope of voluntary action It is what the government of the day is prepared to pay for the crisis of the welfare state but the political dependency of many charities makes them part of the problem instead How much can we expect from a voluntary sector which has allowed itself to be muzzled by contract and neutered by subsidy become not least by imposing costly bureaucracy while stopping short of taking full responsibility leaving the charity to carry the can if something goes wrong The Sunday Telegraph and should lose their charitable status according to a report published today The Daily Telegraph their charitable status Involuntary Action claims the sector should be part of civil society and the expression of conscience of a free people instead of taking ever larger income proportions from the government Charity Times all of those who are concerned about the state of charities as we enter into the 21st century Community Care the National Council for Voluntary Organisations which derives 40 per cent of its income from the government A voluntary sector which cannot fund its own representative body without taxpayers money does not inspire confidence it says Community Care

Nonprofit organizations serve a distinctive role within American society Collectively nonprofits are viewed as major sources of social capital contributors to the public good and the value guardians within communities Nonprofits also have a sizeable and quite positive impact on the nation s economy Despite the social and economic significance of nonprofits though research has shown that nonprofit organizations and resources are not always distributed evenly across communities Indeed Wolch 1990 has observed that some communities are voluntary sector rich while others are voluntary sector poor Therefore many of the benefits often associated with the presence of nonprofits may not be actualized or even attainable in all areas The purpose of this study was three fold First this study was intended to examine how size and scope dimensions of the nonprofit sector differed across communities within a particular region Second this study was intended to test at a local level the relevance of existing theories and concepts that explain variation in the distribution of nonprofit activity Third this study was intended to explore whether and to what extent differences in the voluntary landscape of communities were related to differences in public attitudes toward nonprofit organizations Findings from this study indicated that nonprofit activity varied considerably Through the use of a series of Ordinary Least Squares OLS regression models several theoretically derived community predictors were found to significantly influence the distribution of nonprofit activity Moreover results of a cluster analysis procedure revealed three distinct voluntary sector community types in the study region voluntary sector rich voluntary sector mixed and voluntary sector poor Significant differences were found to exist in public attitudes across community types In particular residents in voluntary sector rich communities expressed the most confidence in and demonstrated the highest awareness of the nonprofit sector Residents in voluntary sector poor communities expressed the least confidence in and demonstrated the lowest awareness of the nonprofit sector More residents in voluntary sector mixed

communities believed that government agencies did the best job of helping people and spending money wisely. Finally, results of several logistic and logit regression models indicated that a number of individual factors influenced public attitudes toward nonprofits in each area.

Social Policy For Nurses And The Helping Professions Peckham, Stephen, Meerabeau, Elizabeth, 2007-04-01. What is social policy and why is it relevant to nursing and other caring professions? How has the welfare state changed in response to new social problems? What roles do professionals and lay people play in providing welfare services? This fully revised text is one of a series of books providing coherent and multi-disciplinary support for all client groups involved in the provision of health and social care. The book examines the relationship between welfare and health and includes discussion of key policy issues such as changes in health care delivery, regulation of professionals, privatisation, welfare pluralism and the tackling of health and social inequalities. The significance of social policy in preventing ill health and disability as well as supporting the sick and disabled people is emphasised throughout the book. This new edition is updated throughout and includes new chapters on Health policy in the post-war period, The role of health and social care professionals, The future of social policy and health in the 21st century.

Social Policy for Nurses and the Helping Profession equips students with a lively, readable and well-illustrated introduction to social policy. The reader is guided through the material with the help of chapter summaries, further reading and a glossary, as well as new examples and case studies to reflect the different client groups within nursing.

Voluntary Sector Organizations and the State Rachel Laforest, 2011. In the early 1990s, voluntary organizations garnered little attention in Canadian policy circles, even though the federal government was simultaneously offloading its responsibility for essential services to the sector and cutting back their funding. Two decades later, the voluntary sector is a key public policy player in federal, provincial and municipal politics. Rachel Laforest shows why this turnaround represents a significant shift in the way citizens and policy makers view the place of voluntary organizations in public policy. Members of voluntary organizations have struggled for a stronger voice in policy making and redefined their relationship to the federal government through key collaborations such as the Voluntary Sector Initiative. This deft account of how a loose coalition of voluntary organizations was transformed into a distinct sector offers a new conceptual framework for explaining dynamic state-voluntary sector

relations at all levels of government
