The Whitin Machine Works Since 1831, Etc. [With Plates.] Thomas R. NAVIN,1950 [The Whitin Machine Works Since 1831](#) Thomas R. Navin,2014-04-23 *The Whitin Machine Works Since 1831* Thomas R. Navin,Norman Scott Brien Gras,Henrietta Melia Larson,1950 *The Whitin Machine Works Since 1831* Thomas Randall Navin,1950 **The Entrepreneurial Multiplier Effect** Louis Galambos,Franco Amatori,2022-12-25 Since the Keynesian revolution in economics a standard part of the profession s analytical framework and an argument for government support for investment has been the multiplier concept This classical multiplier works through consumption in an equilibrium model Our contention is that there is also an Entrepreneurial Multiplier that works directly through investment by incentivizing or forcing investments in innovation in a dynamic disequilibrium model These investments have been analyzed as spill overs or responses to bottlenecks or Schumpeterian examples of emulation We suggest that the surges of innovation in capitalism were even broader than Schumpeter did and that they can best be explored using a multiplier paradigm We start that exploration by briefly examining selected patterns of entrepreneurship in the first second and third industrial revolutions Our emphasis is on the sequences of innovations the manner in which they are multiplied and their economic cultural and political consequences We delve into the First Industrial Revolution in New England and Lombardy the Second Industrial Revolution in the United States and France and the Third Industrial Revolution in America and Europe In all three of these dramatic capitalist transitions there is evidence of the entrepreneurial multiplier at work broadening deepening and extending the impact of the major innovations *Networked Machinists* David R. Meyer,2006-12-20 *economy* Angelina Long Industrial Archaeology *Managers and Workers* Daniel Nelson,1996-01-01 During the early years of this century the classic factory system of the industrial revolution evolved rapidly into a new identifiable form that would characterize American and world industry for most of the twentieth century This transformation as important for industrial managers workers and consumers as the initial creation of the factory is the subject of Daniel Nelson s illuminating synthesis updated and expanded to include the scholarship of recent decades This edition of *Managers and Workers* describes the interrelations between technological and organizational innovation including such familiar developments as the spread of mass production and the emergence of scientific management and other developments that were little known when the first edition of this book appeared such as the revolution in factory architecture the changing role of the foreman and the spread of personnel work The volume also incorporates the best scholarship of the 1970s 1980s and 1990s some of it stimulated by *Managers and Workers* and includes a new chapter on the role of organized labor in the early twentieth century factory The focus of the work however remains the individual managers and workers who created the twentieth century factory system The preeminent historian of the American business firm Alfred D Chandler Jr reviewed the first edition of *Managers and Workers* in *The Journal of Economic History* predicting that this book would long remain the standard work on the origins of the

American factory The second edition will make that prediction true for the 1990s and beyond **Technology and Power in the Early American Cotton Industry** James Montgomery, David J. Jeremy, 1990 Behind the original publication of Montgomery's *Practical Detail* 1840 lay the continuing concern about world markets international economic technological leadership Montgomery's achievement lay in the wealth reliability of the comparative data he assembled for the first time about the Am British cotton industries which were then the high tech of industrializing societies For the tech economics of production of the early 19th century cotton industries his work remains indispensable A mss has recently surfaced in which Montgomery recorded the changes he intended for the 2nd ed of his classic The vol is prefaced by a biog of Montgomery tracing his Scottish background his migration from Glasgow to New England in the 1830s an intro to the 2nd ed establishing its context Appended to the Montgomery text are the documents of the justitia controversy from the Boston newspapers of 1841 in which the merits relative costs of steam water power were debated Scholarly footnotes textual substantive are provided as appropriate Illus **Air-conditioning America** Gail Cooper, 1998 Cooper demonstrates how the lure of the open air from rooftop schoolrooms to open air theaters to the front porch challenged air conditioning Americans were slow to give up the social rituals of hot weather living the cold drink the cool clothes the summer vacation for the comforts of either the window air conditioner or the central system *International Bibliography of Business History* Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The *International Bibliography of Business History* brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians **Millard's Review of the Far East**, 1919 Vol 34 includes Special tariff conference issue Nov 6 1925 Fibre & Fabric, 1929 **American Business History** Louis Galambos, 1967 *A Handbook of New England*, 1921 *Textile World*, 1930 **America's Textile Reporter**, 1901 *A Technical and Business Revolution* Elizabeth Hitz, 1978 TEXTILE AMERICAN., 1928 *Canadian Textile Journal*, 1922 **Landscape of Industry** Worcester Historical Museum, 2009 An illustrated history of the cradle of American industrialization
