Principal Gerald C. Ubben, Larry W. Hughes, 1992 This book provides a bridge from learning the theory of school administration to the practical problem solving in which school principals and other leaders engage This book continues to be based on the research indicating linkages between educational leadership and productive schools especially in terms of outcomes for children It supports the understanding that formal leadership in schools is a complex multi faceted task that requires continual learning and that effective school leaders must be strong educators focused on the central issues of learning teaching and school improvement School leaders must also be moral agents and social advocates for the children and communities they serve while working with community stakeholders to create learning communities that value and care for others as individuals and as members of the educational community For those aspiring to become principals or hold leadership positions *Commitment to Excellence* Robert Harlan Davis, Allan J. Court of Appeal (4th Appellate District). Division 3. Records and Briefs California (State)., *Report of the Council of the United Nations University* United Nations University. Council, 2005 **Building Civic Capacity**, 2001 The authors of this volume argue that urban education is in urgent need of reform and that although there have been plenty of innovative and even promising attempts to improve conditions most have been doomed The reason for this they agree lies in the failure of our major cities to develop their civic capacity The ability to build and maintain a broad social and political coalition across all sectors of the urban community in pursuit of a common goal *Research Training Networks*, 1999
