Innovative Teaching and Learning in Health Education and Promotion María Dolores Ruiz Fernández, Emilia Isabel Martins Da Costa, Isabel María Fernández Medina, Maria Del Mar Jimenez Lasserrotte , Maria Isabel Ventura-Miranda, 2026-02-06

Our focus for this research topic is the intriguing and ever evolving landscapes of health pedagogy. This realm a convergence of education healthcare and public engagement remains paramount to fostering knowledgeable communities equipped to navigate health related intricacies. Traditional teaching methodologies have played a seminal role providing a robust foundation in this sphere with lectures seminars and experiential learning forming crucial pillars of health education. However as global health landscapes shared and individual health needs transform rapidly it becomes critical that our approaches to health education and promotion keep pace. This begs a closer look into burgeoning teaching innovations and insightful learning approaches designed to advance health promotion. This research topic aims to illuminate fresh transformative and impactful pedagogical strategies in the realm of health education for the public and health professionals alike. More specifically it seeks to spotlight ways that technology coupled with innovative pedagogical thought is revolutionizing health education and promotion. For instance the adoption of virtual or augmented reality for simulated patient experiences shows promise in fostering empathy and acuity in medical students. Likewise online platforms and digital gamification have extended the walls of traditional classroom providing flexible personalized learning environments. While these strides have been monumental gaps exist in comprehensively understanding their effectiveness standardizing their application and guaranteeing their access across diverse contexts. This research topic intends to stir discourse around these areas uncovering strategies to guide future development and deployment of innovations in health education. In pursuit of a comprehensive exploration of this thematic sphere we welcome research submissions delineating a range of topics. Manuscripts could explore the efficacy of innovative teaching methods in enhancing learners comprehension retention and application of health knowledge. We are interested in evaluations of existing digital educational platforms in health promotion exploring their scope accessibility adaptability and impact on learning outcomes. Studies comparing traditional and contemporary teaching methods in terms of efficiency outcomes and acceptance would provide insightful perspectives. Contributions may also delve into health literacy and its correlation with different teaching and learning modalities. Lastly research uncovering barriers to implementing innovative teaching methods in diverse educational settings along with propositions to overcome these would be invaluable. We ultimately aim to stitch together a rich tapestry of discourse research and innovation catalyzing the enrichment of health education and promotion for the public and health professionals. Papers that are based on the education of health professionals should be submitted to *Frontiers in Medicine*.
