metaphysical discovery that Plato presented as a result of the Second Voyage This discovery of the supersensible is in Reale's view not only the fundamental phase of ancient thought but it also constitutes a milestone on the path of western philosophy Reale presents Plato in three different dimensions the theoretic the mystical religious and the political Each of these components takes on meaning from the Second Voyage In addition Reale has shown that only in the light of the Unwritten Doctrines handed down through the indirect tradition do these three components and the Second Voyage itself acquire their full meaning and only in this way is a unitary conception of Plato's thought achieved The interpretation of Aristotle that Reale proposes depends on his interpretation of Plato Aristotle read without preconceptions is not the antithesis of Plato Reale points out that Aristotle was unique among thinkers close to Plato in being the one who developed at least in part his Second Voyage The systematic unitary interpretation of Aristotle which Reale has previously supported converges with the new systematic unitary interpretation of Plato Certain doctrinal positions which are usually reserved to treatments in monographs will be explored because only in this way can the two distinctive traits of Aristotle's thought emerge the way in which he tries to overcome and confirm the Socratic Platonic positions and the way in which he formally creates the system of philosophical knowledge

James Cook's Voyage Towards the South Pole and Round the World James Cook, 2020-12-17 James Cook's Voyage Towards the South Pole and Round the World in 2 volumes is an inspiring personal account of the second voyage of James Cook from 1772 to 1775, commissioned by the British government with advice from the Royal Society, which was designed to circumnavigate the globe as far south as possible to finally determine whether there was any great southern landmass or Terra Australis. On his first voyage, Cook had demonstrated by circumnavigating New Zealand that it was not attached to a larger landmass to the south and he charted almost the entire eastern coastline of Australia, yet Terra Australis was believed to lie further south. Alexander Dalrymple and others of the Royal Society still believed that this massive southern continent should exist. In the course of the voyage, he visited Easter Island, the Marquesas, Tahiti, the Society Islands, Niue, the Tonga Islands, the New Hebrides, New Caledonia, Norfolk Island, Palmerston Island, South Sandwich Islands, and South Georgia, many of which he named in the process. Cook proved the Terra Australis Incognita to be a myth and predicted that an Antarctic land would be found beyond the ice barrier.

Myth and Metaphysics in Plato's Phaedo David A. White, 1989 This study intends principally to isolate and describe the function of myth in the Phaedo in order to show its effect on the complex metaphysics developed throughout the dialogue. It further illustrates how these metaphysical concepts structure the dialogue's concluding eschatological myth. Strangers Among Us David Charles Woodman, 1995 David Woodman re-evaluates the importance of Inuit oral traditions in his search to reconstruct the events surrounding Sir John Franklin's tragic 1845 expedition. He shows that often misunderstood tales of white men travelling through Inuit lands may in fact refer to survivors of the Franklin expedition. **The Second Voyage of Rodolph the Voyager** G. D.
