Analysis:

In free design, higher building heights have been achieved due to presence of higher FSI, while in constraint due to less FSI low lying buildings have been formed in the market area. This is also due to smaller plot sizes in Free design.

Open spaces are formed better in constraint design providing accessibility to assembly and acting as a buffer space at the same time. Green street connectivity in free design provides better walkability and functionality in pedestrian.

In Constraint design, due to large margins and setbacks, and large layout spaces in the plots as per the regulator, it is difficult to acquire the required ground coverage as per the regulations, resulting in low density.

The Urban Condition Brendan Gleeson,2014-05-23 This book will speak to the new human epoch the Urban Age A majority of humanity now lives for the first time in cities The city the highest invention of the modern age is now the human heartland And yet the same process that brought us the city and its wonders modernisation has also thrown up challenges and threats especially climate change resource depletion social division and economic insecurity This book considers how these threats are encountered and countered in the urban age focusing on the issue of human knowledge and self awareness just as Hannah Arendt s influential *The Human Condition* did

half a century ago The Human Condition is now The Urban Condition And it is this condition that will define human prospects in an age of default and risk Gleeson expertly explores the concept through three main themes The first is an exploration of what defines the current human condition especially the expanding cities that are at the heart of an over consumptive world economic order The second exposes and reviews the reawakening of forms of knowledge naturalism that are likely to worsen not improve our comprehension of the crisis The new science of urbanism in popular new literature exemplifies this dangerous trend The third and last part of the book considers prospects for a new urban and therefore human dispensation The Good City We must first journey in our urban vessels through troubled times But can we now start to plot the way to new shores to a safer more resilient city that provides for human flourishing The Urban Condition attempts this ideal conceiving a new urbanism based on the old idea of self limitation The Urban Condition is an original timely book that reconsiders and redeploys Arendt s famous notion of The Human Condition in an age of cities and risk It brings together several important strands of human consideration urbanisation climate threat resource depletion economic default and critical knowledge and weaves them into a new analysis of the times It also looks to a future that is nearly with us of changed climate resource scarcity and economic stress The book journeys into these troubled times proposing the idea of Lifeboat Cities as a way of thinking about the human journey to come

The Urban Condition Olivier Mongin,2023-05-05 The first installment in Karolinum s new V clav Havel Series which aims to continue the philosophical discourse of that thinker playwright dissident and president this book asks whether it will be possible to reestablish urban spaces that are in tune with our times By recalling the distinctive elements that comprise the urban experience Olivier Mongin lays the basis for reflection on the contemporary urban condition We live in an epoch in which information exchange takes place according to flows rather than in locations in which globalization has thrust us into a post city post urban world In the past we were accustomed to seeing the city as a circumscribed space the setting for cultural social and political life that enabled the civic integration of individuals Now we find ourselves confronted by both seemingly limitless gigantic megalopolises and the emergence of global networks of entities cut off from a physical environment The current reconfiguration is cause for concern Are we witnessing the terminal decline of the urban values that have been a concomitant part of recent human history Will fragmentation and chaotic urban sprawl inevitably prevail Are we doomed to lament the lost legacies of the Greek polis the Renaissance city Enlightenment Paris and the great industrial cities of the nineteenth century

Displacement, Revolution, and the New Urban Condition Ipsita Chatterjee,2016 This title attempts to theorise the contemporary urban condition by arguing that displacement forms the central logic of urban exploitation In order to theorise urban exploitation it is important to understand who is having to move and where who is being resettled and how and how is this process of displacing and resettling oppressive

Urban Planning in Lusophone African Countries Carlos Nunes Silva, 2016-03-09 Urban planning on the five Lusophone African countries Angola Cape Verde Guinea Bissau Mozambique and Sao Tome and Principe has so far been relatively overlooked in planning literature Bringing together a team of leading scholars this book fills the gap by providing an in depth analysis of key issues in the history of urban planning and discussing the key challenges confronting contemporary urban planning in these countries The book argues that urban planning is a non neutral and non value free kind of public action and therefore ideology planning theories urban models and the ideological role urban planning has played are some of the key issues addressed For that reason the practice of Urban Planning is also seen as the outcome of a complex interrelationship between structure and agency with the role of key planners being examined in some of the chapters The findings and insights presented by the contributing authors confirm previous research on urban planning in the colonial and postcolonial periods in Lusophone African countries and at the same time break fresh ground and offer additional insights as new evidence has been collected from archives and in fieldwork carried out by a new generation of researchers In addition it outlines possible directions for future research
