extraction of surplus value from workers through the creation of non standard jobs and the restructuring of work A central component of the restructuring of work is the extension of gig employment through the development of algorithmic platforms which direct labourers to perform discrete tasks This is a definitive collection representing the primary reference work contributing to our understanding of the subject The book is written and presented in a clear manner accessible to scholars and researchers of international political economy labour economics and sociology who are eager for new research examining this phenomenon as well as specialists in the field of labour relations Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by the University of Amsterdam
