The Virtual Campus Gerald C. Van Dusen,1997 The virtual campus is a metaphor for the electronic teaching learning and research environment created by the convergence of several relatively new technologies including but not restricted to the Internet World Wide Web computer mediated communication video conferencing multi media groupware video on demand desktop publishing intelligent tutoring systems and virtual reality The focus of this monograph is of necessity limited to changes occurring in higher education institutions that are committed to reform via technology A survey of the literature finds reform characterized by changes in teaching learning research and scholarly activity organizational culture and governance and finance Section 2 takes up teaching on the virtual campus and how institutional variables influence adoption of information technologies according to their particular missions and goals Section 3 on classroom learning contrasts traditional and virtual classrooms and describes the interface capabilities of various technologies Section 4 explores recent reconceptualizations of scholarship as well as new computer based technologies that are beginning to influence both the methods and substance of research Section 5 depicts efforts to reform both the bureaucratic and academic spheres of higher education institutions by applying principles of Total Quality Management Section 6 delineates some of the important new responsibilities of governing boards including monitoring regulatory legislation establishing a telecommunications policy and shepherding resources for technology The final section draws conclusions from the literature and makes recommendations for institutional planning and research Specifically the seven conclusions are 1 a paradigm shift can occur only in institutions committed to comprehensive reform 2 attempts to

change the classroom focus from the sage on the stage to collaborative learning are likely to fail without a substantial commitment to professional development 3 higher education will continue to be market driven requiring redoubled efforts to define academic productivity 4 new constituencies appear to be well served by a variety of available distance learning venues 5 the TQM movement has made impressive inroads in higher education administration however very little penetration has occurred when it most matters on the academic side of the institution 6 even as instructional use of technology rises institutional support for applications development has been dilatory and 7 the historic commitment to core values in traditional undergraduate education has wavered the same vacillation threatens to undermine general education requirements in electronically delivered certificate and degree programs Seven recommendations for beginning this process of integration include 1 create a venue where key stakeholders can analyze major technology issues and purchases 2 assert the value of technology based learning from a variety of research perspectives 3 establish quality standards for certificate and degree programs 4 avoid pitting traditionalists against technology enthusiasts 5 make collaboration and cooperation not reengineering and restructuring the new institutional buzz words 6 retain a strong commitment to adequate library staffing and funding and 7 prepare for success by creating the necessary support structures A glossary of terms is appended Contains 228 references AA **Sailing Into the Future** Association of College and Research Libraries. National Conference, 2007 A collection of the invited and contributed papers for the ACRL 13th National Conference in Baltimore MD March 29 April 1 2007 *Leadership for Excellence* Jo Ann Carr, 2008-06-09 How do the most successful school library media specialists play a leading role in student achievement in their schools Jo Ann Carr and AASL share behind the scenes details and best practices including how and why top programs succeed get funding and become integral contributors to their school communities Highlighting exemplary school library media centers this collection of case histories and reflections from leaders of award winning programs examines what works and why Learn how winners integrate their programs into the school curriculum and drive excellence within the learning community Explore websites of the award winners and review worksheets fliers and before and after photos to understand the process behind the success BOOK JACKET *IEEE Virtual Reality 2000* Haruo Takemura, Kiyoshi Kiyokawa, 2001 Annotation Contains 33 papers and 12 posters presented at the March 2001 conference that reviewed research progress in virtual reality and defined new research goals The main subjects are haptic display tracking and motion capture software and tools haptics and locomotion interface 3D displays applications human factors and haptic simulation Sample topics are a surface acoustic wave tactile display based on properties of mechanoreceptors fusion of vision and gyro tracking for robust augmented reality registration interactive texturing by polyhedron decomposition a washout filter designed for a motorcycle simulator and the effects of field of view on balance in an immersive environment No subject index c Book News Inc
