consciousness has noticed that this is something that doesn't need to be focused on. You have done it again and again regularly and repetitively so your brain instantly realizes no conscious effort or focus is needed. Since the conscious part of your mind cannot handle too much information at once it is more than happy to give the task over to the incredible processing power of your subconscious. By weight loss fitness journaling on a regular schedule your conscious behaviors eventually become unconscious. That means your subconscious brain automatically prepares your body and mind for whatever your journaling requires the next time a regularly scheduled food journal session arises.

**How Tracking Progress Makes It Easier Now** comes the exciting part. You plan to start keeping a weight loss fitness journal that focuses on eating whole foods and maintaining fitness exercises for weight loss. You want to eat more healthier foods while cutting back on the types of foods and beverages that are not that good for you. You plan on sticking to a diet accompanied with a fitness exercise routine for at least 30 days. You have this journal and start tracking and monitor how it affects you. When your desire is to lose weight you will begin to notice food consumption and exercise patterns where your routine behavior either causes your body weight to rise or fall. With your conscious effort on losing weight your focus will tend towards what eating behaviors and your physical training schedule at different timing and types of clean whole foods and different exercise routine schedule results and lead you in that direction and away from weight gain. So you begin reschedule your tracked exercise program and eating concisely based on your tracker performance. You journal your results and you begin to notice your weight loss progression increasing and doing the right exercise with a proven track measurement.
