Criminal Justice Technology in the 21st Century Laura J. Moriarty, 2025 The fourth edition of Criminal Justice Technology in the 21st Century comes just about five years after the COVID 19 pandemic when technology took a more prominent role in our everyday lives and more importantly in the criminal justice system Ideas that once were mere thoughts from academics pondering the future have become everyday realities While most areas of life came to a standstill as the pandemic ensued the criminal justice system could not stop Crime adapts more seamlessly than other aspects of society and as such the criminal justice system needed to adapt as well The contributing authors were asked to consider the pandemic and its impact on evolving technology and advancements to address crime Likewise other societal concerns focusing on law enforcement and its questionable use of force at times have escalated the need for technology to ensure that over policing in minority neighborhoods and accountability is established or not to deescalate violence whether police brutality or protester police violence The impact of technology remains to be seen but there is real hope that such technology can begin to shed light on what is happening in these volatile situations Either the current contributors have updated their chapters from the Third Edition or there are new contributors focusing on the abovementioned issues This fourth edition with more than 20 contributors highlights the most current thinking about criminal justice technology The book is longer than the

previous editions but has fewer chapters This is the result of paring down what is included in this new edition The hope is that these chapters will be the most relevant and useful to both the expert and the neophyte Criminal justice technology will continue to advance and we must keep abreast of new trends

Digital Dead End Virginia Eubanks,2012-09-21 The realities of the high tech global economy for women and families in the United States The idea that technology will pave the road to prosperity has been promoted through both boom and bust Today we are told that universal broadband access high tech jobs and cutting edge science will pull us out of our current economic downturn and move us toward social and economic equality In Digital Dead End Virginia Eubanks argues that to believe this is to engage in a kind of magical thinking a technological utopia will come about simply because we want it to

This vision of the miraculous power of high tech development is driven by flawed assumptions about race class and gender. The realities of the information age are more complicated particularly for poor and working class women and families. For them information technology can be both a tool of liberation and a means of oppression. But despite the inequities of the high tech global economy optimism and innovation flourished when Eubanks worked with a community of resourceful women living at her local YWCA. Eubanks describes a new approach to creating a broadly inclusive and empowering technology for people popular technology which entails shifting the focus from teaching technical skill to nurturing critical technological citizenship building resources for learning and fostering social movement.
