Using Technology with Classroom Instruction That Works Howard Pitler,Elizabeth R. Hubbell,Matt Kuhn,2012-08-02

Technology is ubiquitous and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: Setting objectives and providing feedback; Reinforcing effort and providing recognition; Cooperative learning; Cues, questions, and advance organizers; Nonlinguistic representations; Summarizing and note taking; Assigning homework and providing practice; Identifying similarities and differences; Generating and testing hypotheses. Each strategy-focused chapter features examples across grade levels and subject areas, drawn from real-life lesson plans and projects of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and most of all, more effective.

*Teaching and Learning with Technology* Judy Lever-Duffy, Jean B. McDonald, Al P. Mizell, 2003. This book offers a pragmatic, reader-friendly approach that helps teachers explore, evaluate, and effectively integrate the full range of instructional technologies they are likely to find in their classrooms. Founded in learning theory and instructional design, this book explores the current and emerging technologies available to teachers while consistently maintaining an instructional focus. Using practical applications and real-world examples, the book offers readers the opportunity to explore technologies as tools to enhance and support instruction. It culminates with an exploration of the teacher's role in technology planning and in ensuring its ethical implementation. The reader will find Web activities and a wide range of activities in each chapter, including reviews, group critical thinking, and hands-on experiences.
