Technology And Choice:

Technology Choices Diane E. Bailey, Paul M. Leonardi, 2015-01-30 An analysis of the occupational factors that shape the technology choices made by people who perform the same type of work Why do people who perform largely the same type of work make different technology choices in the workplace An automotive design engineer working in India for example finds advanced information and communication technologies essential allowing him to work with far flung colleagues a structural engineer in California relies more on paper based technologies for her everyday work and a software engineer in Silicon Valley operates on multiple digital levels simultaneously all day continuing after hours on a company supplied home computer and network connection In *Technology Choices* Diane Bailey and Paul Leonardi argue that occupational factors rather than personal preference or purely technological concerns strongly shape workers technology choices Drawing on extensive field work a decade s worth of observations and interviews in seven engineering firms in eight countries Bailey and Leonardi challenge the traditional views of technology choices technological determinism and social constructivism Their innovative occupational perspective allows them to explore how external forces shape ideas beliefs and norms in ways that steer individuals to particular technology choices albeit in somewhat predictable and generalizable ways They examine three relationships at the heart of technology choices human to technology technology to technology and human to human An occupational perspective they argue helps us not only to understand past technology choices but also to predict future ones

Technology Choice Kelvin W Willoughby, 1990 *Technology and Choice* Marcel Chotkowski LaFollette, Jeffrey K. Stine, 1991 Innovation the imaginative attempt to introduce something new or to solve some problem smashes routine and demands choice even if only the choice to retain the status quo This collection of fourteen essays provides a spectrum of historical perspectives on how when or why individuals societies governments and industries have made choices regarding the use of technologies Through historical accounts that span centuries and national boundaries exploring the complexity of a nuclear power plant and the apparent simplicity of an electrical plug the contributors to this volume dramatically illustrate the push and pull between technology and society General topics addressed include Regulation of private industry Social acceptance of commercial innovation Negative perceptions of the Technological Age Cultural and artistic features of technology Provocative and accessible this collection will serve both students and faculty in history sociology and public policy as well as in history and philosophy of science and technology These essays were originally published in the journal *Technology and Culture* [Comparative Technology Choice in Development](#) Gustav Ranis, Keijiro Itsuka, 1988-03-15

Technology Choice Kelvin W Willoughby, 2019-07-09 This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments [Technology Review](#) , 1922 *Firms, Markets, and Contracts* Ekkehart Schlicht, 2012-12-06 Modern institutional economics witnesses a merging of formal and informal strands of

theorizing This development has offered new and vigorous perspectives which avoid both arbitrariness and theoretical sterility The essays on contract theory gathered here exemplify this development They propound new results on central issues in contractual theorizing The theory of the firm in its variegated aspects forms naturally the core of the present set of contributions Issues of ownership integration delegation and finance are analyzed Some contributions use the theoretical approach of contract theory to explore other issues like medical care public good problems the economics of crime environmental economics and international trade The contributors are leading young economists They have participated in one or several classes of the International Summer School on the New Institutional Economics which has been organized by Rudolf Richter in the years 1988 through 1994 and is now continued by Urs Schweizer The theoretical style of these contributions has been influenced by this experience This collection of essays is intended to express the thanks of the contributors to Rudolf Richter His initiatives for scholarly instruction and for international exchange of ideas have helped to create and to diffuse the understanding of and the engagement for the new institutional economics in Europe *Abstracts of Scientific and Technical Publications from the Massachusetts Institute of Technology, Including Abstracts of Doctors' Theses* Massachusetts Institute of Technology, 1928 Including abstracts of doctors theses January 1 1927 Dec 31 1927

Abstracts of Scientific and Technical Publications from the Massachusetts Institute of Technology Massachusetts Institute of Technology, 1929 *The American School Board Journal* William George Bruce, William Conrad Bruce, Susanna Cocroft, 1916 A periodical of school administration Economics Lionel Danforth Edie, 1926 The Journal Worcester Polytechnic Institute, 1929 Annual Catalog ... University of Idaho, 1912 *Signal*, 1993 **Handbook of Technology Management** Gerard H. Gaynor, 1996 Gives you an enterprise wide view of technology to help you manage your business as a system optimize investments in technology achieve efficient business integration and monitor and measure TM effectiveness Detailed case studies illustrate the TM efforts of such organizations as Motorola and Digital Equipment **Classed List** Princeton University. Library, 1920 **Tech Engineering News**, 1920 **Classified List ...** Princeton University. Library, 1920 The Politics of Problem Definition David A. Rochefort, Roger W. Cobb, 1994 At the nexus of politics and policy development lies persistent conflict over where problems come from what they signify and based on the answers to those questions what kinds of solutions should be sought Policy researchers call this process problem definition Written for both scholars and students this book explains how and why social issues come to be defined in different ways how these definitions are expressed in the world of politics and what consequences these definitions have for government action and agenda setting dynamics The authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high profile social issues like AIDS drugs and sexual harassment as well as for problems like traffic congestion plant closings agricultural tax benefits and air transportation By examining the way social problems are framed for political discussion the authors illuminate the unique impact of beliefs values ideas and language on

the public policymaking process and its outcomes In so doing they establish a common vocabulary for the study of problem definition review and critique the insights of existing work on the topic and identify directions for future research
