Technology and Society, Run Time 26 minutes Managing Technology in Society Arie Rip, Thomas J. Misa, J. W. Schot, 1995 A fateful conceptual gap separates the policy makers and managers charged with promoting technology and the risk and technology assessors responsible for controlling it This hampers the effective use of many new technologies and prevents the development of others The strategy of constructive technology assessment CTA addresses this gap through facilitating societal learning processes and proposing a shared responsibility for the promotion and control of new technologies Combining analysis of both cases and concepts Managing Technology in Society confronts the underdevelopment of innovative potential for achieving goals of wealth sustainability and safety Factors that block change as well as conditions for successful learning are identified in a wide ranging selection of cases that encompass biotechnology clean technologies information and medical technologies The contributors build on the convergence of recent theories on technical change within economics sociology and the history of technology to offer suggestions for CTA action and so create a new paradigm of managing technology in society BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Science, Technology, and Society Andrew Webster, 1991 Read any newspaper or watch your television and as often as not you will be confronted by the worries hopes challenges and mistakes of science and technology Sociology has been trying to make sense of science for many years while government and industry have promoted and exploited it for even longer But what are science and technology How have they been shaped by society What new directions are they taking Andrew Webster provides a lively and accessible introduction to the sociological analysis of science and technology exploring contemporary debates in a comprehensive and balanced fashion and showing how the findings of sociologists of science relate to important issues of science policy and politics Biotechnology and genetic engineering technology transfer feminist and radical critiques of science big science projects science parks and research within private industry are some of the topics that provide the focus for a wide ranging critical yet constructive sociological discussion Science Technology and Society will be of particular value to students academics and practitioners involved in studying and helping to shape these two very powerful institutions of society Impact of technology on society Bettina Schmeikal, 1983

The Technological Society Jacques Ellul, 2021-07-27 As insightful and wise today as it was when originally published in 1954 Jacques Ellul's The Technological Society has become a classic in its field laying the groundwork for all other studies of technology and society that have followed Ellul offers a penetrating analysis of our technological civilization showing how technology which began innocuously enough as a servant of humankind threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book A magnificent book He goes through one human activity after another and shows how it has been technicized rendered efficient and diminished in the process Harper's One of the

most important books of the second half of the twentieth century In it Jacques Ellul convincingly demonstrates that technology which we continue to conceptualize as the servant of man will overthrow everything that prevents the internal logic of its development including humanity itself unless we take necessary steps to move human society out of the environment that technique is creating to meet its own needs The Nation A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception subverting and suppressing these values to produce at last a monolithic world culture in which all non technological difference and variety are mere appearance Los Angeles Free Press **Starting the Dialogue** Marie Hoepfl, Brian Raichle, James Byron Houser, 2015-08-05 Technology in Society, 1979 **Technology and Its Discontents** Levent V. Orman, 2013 We are defined by the tools and technologies we use They shape our identity They feed and shelter us But they also threaten our very existence What separates us from all other animals is primarily the plethora of tools and technologies we created for our well being and for our very survival They are the source of our admirable success as a species and they are the source of our most terrifying problems Sometimes they are the only solution to the very problems they created That puts us in a race against ourselves a race among technologies a race between the good they do and the misery they cause often the same technology doing both at different times and under different conditions This has been the human condition from the beginning of our species and it will likely be the human condition at the end Although we appear helpless being dragged along a road carved by our own creations there are some things we can do to minimize the risk to ourselves without giving up all the advantages of a myriad of technologies we created We may not be able to eliminate the basic paradox of human existence but we may somewhat reduce the suffering This book is about the beauty and the misery of our technological human society offering some modest remedies for the misery while praising the beauty Technology and Society Harrington, 2008-08-21 Technology and Society illustrates the impact of technological change both positive and negative on our world The author looks at how technology has brought many positive advancements to our society and also discusses the significant repercussions that we need to consider Important Notice The digital edition of this book is missing some of the images or content found in the physical edition *From Need to Greed* Ernest Braun, 2010 The book is a result of many years of thinking about the role of technology in human life and about the ways in which new technologies develop
