Technology For Results Developing Service Based Plans:

Technology for Results Diane Mayo, Public Library Association, 2005-05-18 Answering two key questions can enhance the effectiveness of current library technologies and ensure that new investments support the library's mission. First, what technologies provide the most effective support for the library's service priorities? Second, what technologies allow administrative functions to be managed more efficiently?

Implementing for Results Sandra Nelson, 2009 Companion volume to *Strategic planning for results: Introduction to Public Librarianship, Third Edition* Kathleen de la Pena McCook, Jenny S. Bossaller, Felton Thomas Jr., 2018-12-18 Put simply, there is no text about public librarianship more rigorous or comprehensive than McCook's survey. Now the REFORMA Lifetime Achievement Award-winning author has teamed up with noted public library scholar and advocate Bossaller to update and expand her work to incorporate the field's renewed emphasis on outcomes and transformation. This essential tool, *Library Journal* remains the definitive handbook on this branch of the profession. It covers every aspect of the public library from its earliest history through its current incarnation on the cutting edge of the information environment, including statistics, standards, planning, evaluations, and results, legal issues, funding, and politics, organization, administration, and staffing, all aspects of library technology from structure and infrastructure to websites and makerspaces, adult services, youth services, and children's services, associations, state library agencies, and other professional organizations, global perspectives on public libraries, and advocacy, outreach, and human rights. Exhaustively researched and expansive in its scope, this benchmark text continues to serve both LIS students and working professionals.

Creating a Learning Commons Lynn D. Lampert, Coleen Meyers-Martin, 2019-01-24 *Creating a Learning Commons: A Practical Guide for Librarians* provides experienced and detailed, research-based guidance for academic librarians and other professionals charged with creating a learning commons. Readers can follow the entire process of developing a library learning commons, design and implementation, plan from inception to post-occupancy planning and assessment. This practical guide is designed to help librarians develop sound strategies for navigating the challenging issues that often emerge in launching a dynamic and collaborative new library learning commons space within a university or college setting. Lampert and Meyers-Martin provide a practical guide, complete with examples and photos of award-winning learning commons designs. This book will help dedicated professionals identify best practices within today's existing learning commons settings and get up to speed on how to best approach developing their own library's new and innovative learning spaces.
