Technology Regions And Policy:

Technology, Regions, and Policy John Rees, 1986 *Technology Regions and Policy* examines the links between technological change regional development and government policy This timely book provides a synthesis of recent scholarship the results of original research projects carried out by a distinguished group of academics It explores the complex questions of how high technology areas develop the factors influencing the spread of industrial technology and the impact of technological change on labor creation and displacement

Growth Policy in the Age of High Technology Jurgen Schmandt, 2018-03-27 Originally published in 1990 this book provides an authoritative and detailed account of the initiatives of US state governments with science and technology programs designed to foster economic growth Two key questions are posed Do state governments have policy instruments that are sufficiently powerful to affect the levels and growth rates of their regional economies and Are national and global economic forces so powerful that they render state action ineffective Several subsidiary themes are discussed in this context namely the most commonly used policy instruments the impacts on federalism and on governance and how well the universities and other educational institutions serve the economic activities imposed on them

New Models In Geography Richard Peet, Nigel Thrift, 2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original *Models in Geography* was published It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis its own questions and debates The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach Moreover from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally it has now flowered into a consistent part of enquiries that span the entire realm of social studies

Regional Innovation, Knowledge and Global Change Zoltan Acs, 2013-12-19 First Published in 1999 The process of globalization is shaped and reinforced by a rapidly changing knowledge environment As economies become less constrained national frontiers they become more geographically specialized Thus important elements of the innovation process tend to become regional rather than national In this new environment large corporations are weakening their links with their home country spreading their innovation activities to source different regional systems of innovation Regional networks of firms are creating new forms of learning and production The aim of this book is to broaden both conceptually and empirically the national systems of innovation approach developed by Lundvall Freeman Nelson and others While recognizing the creative nature of economic adjustment in a turbulent world and the highly uneven distribution of economic growth the national systems approach lacks a mechanism by which to understand innovation when realistic unit of analysis is

no longer the nation state Written by leading scholars in the field this book provides a ground breaking examination of sub regional systems of innovation in an interconnected global economy **Regions in Recession and Resurgence** Michael Chisholm,2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government **Regional Disparities in Small Countries** Daniel Felsenstein,Boris A. Portnov,2005-12-28 1 2 Daniel Felsenstein and Boris A Portnov 1 Department of Geography Hebrew University of Jerusalem Israel 2 Department of Natural Resources and Environmental Management University of Haifa Israel During the Candiot War of 1645 1669 the Ottoman Sultan Ibrahim I ordered his chief admiral to attack Malta Fearing imminent defeat by the superior Venetian forces stationed on the island the admiral decided to trick the sultan out of the idea As the story goes he placed a candle on his naval map allowing the wax to drip on the tiny island until it was completely covered Then he exclaimed in false surprise Malta Yok There is no Malta and convinced the sultan to sail his fleet to the Island of Crete instead Although Malta is not featured in this volume most of the countries it covers are of wax drip size Intuitively it may be expected that everything in small countries is diminutive distances population economies and even regional inequalities Thus at a symposium on The Challenge of Development convened in Israel in 1957 to mark the inauguration of a new building for the Department of Economics at the Hebrew University of Jerusalem the eminent US economist Simon Kuznets stated that developed small states seem to have succeeded in spreading the fruits of economic growth more widely among their populations than the larger states at comparable levels of income per capita **Innovation and Entrepreneurship in the Academia** Erik E. Lehmann,Michele Meoli,Stefano Paleari,2021-12-19 This book aims to contribute to the understanding and evaluation of the processes through which innovative knowledge is created and translated to entrepreneurial technological advantage in higher education institutions The chapters included in this edited volume discuss new trends related to the impact of policies on innovation and entrepreneurial activity in universities by providing a variety of insights from both an individual and an institutional perspective and with reference to a number of different contexts and units of analysis The integration of both qualitative and quantitative approaches as well as the multidisciplinary approach that characterizes this

volume makes it possible to provide an in depth understanding of today s dynamics The volume will be of relevance to scholars students and researchers interested in Entrepreneurship Higher Education Economics and Technology Management The chapters in this book were originally published as a special issue of the journal Industry Innovation **Regional Development in The 1990s** Ron Martin,Ron L. Martin,P. M. Townroe,1992 In the first half of this book region by region profiles review the experience of the 80s and reflect on the present climate assessing problems and opportunities as they look forward across the next decade The second half provides 25 commentaries on changes influencing the development of regions from questions of industry technology and employment to the impact of national policy and 1992 and the prospects and capacity for regional policy and development From these a number of conclusions are drawn for policy development at local regional national and EEC levels **Reader's Guide to the Social Sciences** Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense **Urban Growth and Development in Asia: Living in the cities** Graham Chapman,Ashok K. Dutt,Robert W. Bradnock,1999 These two volumes provide a panoramic survey of the patterns causes and consequences of urbanization in Asia The volume I examines the physical aspects of urbanization and the Volume II deals with the human and environmental impacts Together they form a ground breaking insight into the nature and prospects of Asian urbanization Adapt du r sum de l diteur **Signal** ,1993 *Journal of Regional Policy* ,1993
