**Topics in Modern Logic** D. C. Makinson, 2019-11-04 Originally published in 1973 This book is directed to the student of philosophy whose background in mathematics is very limited The author strikes a balance between material of a philosophical and a formal kind and does this in a way that will bring out the intricate connections between the two On the formal side he gives particular care to provide the basic tools from set theory and arithmetic that are needed to study systems of logic setting out completeness results for two three and four valued logic explaining concepts such as freedom and bondage in quantificational logic describing the intuitionistic conception of the logical operators and setting out Zermelo s axiom system for set theory On the philosophical side he gives particular attention to such topics as the problem of entailment the import of the Löwenheim Skolem theorem the expressive powers of quantificational logic the ideas underlying intuitionistic logic the nature of set theory and the relationship between logic and set theory There are exercises within the text set out alongside the theoretical ideas that they involve *Topics in Philosophical Logic* N. Rescher, 2013-03-09 The aim of the book is to introduce the reader to some new areas of logic which have yet to find their way into the bulk of modern logic books written from the more orthodox direction of the mainstream of developments Such a work seems to me much needed both because of the intrinsic value and increasing prominence of the nonstandard sector of logic and because this particular sector is of the greatest interest from the standpoint of philosophical implications and applications This book unites a series of studies in philosophical logic drawing for the most part on material which I have contributed to the journal literature of the subject over the past ten years Despite the fact that some of these essays have been published in various journals at different times they possess a high degree of thematic and methodological unity All of these studies deal with material of substantial current interest in philosophical logic and embody a fusion of the modern techniques of logical and linguistic philosophical analysis for the exploration of areas of logic that are of substantial philosophical relevance **A New Logic** Charles Arthur Mercier, 1912 *The Development of Modern Logic* Leila Haaparanta, 2009-06-18 This volume contains newly commissioned articles covering the development of modern logic from the late medieval period fourteenth century through the end of the twentieth century It is the first volume to discuss the field with this breadth of coverage and depth It will appeal to scholars and students of philosophical logic and the philosophy of logic **Annual Catalogue** United States Air Force Academy, 1985 **A Fortiori Logic** Avi Sion, 2013-11-24 **A FORTIORI LOGIC INNOVATIONS HISTORY AND ASSESSMENTS** by Avi Sion is a wide ranging and in depth study of a fortiori reasoning comprising a great many new theoretical insights into such argument a history of its use and discussion from antiquity to the present day and critical analyses of the main attempts at its elucidation Its purpose is nothing less than to lay the foundations for a new branch of logic and greatly develop it and thus to once and for all dispel the many fallacious ideas circulating regarding the nature of a fortiori reasoning *The Nature of Ideas* Philosophical Union of the University of California, 1926 **Undergraduate**
