Topics in the Theory of Lifting Alexandra Ionescu Tulcea,C. Ionescu Tulcea,2012-12-06 The problem as to whether or not there exists a lifting of the M_t space corresponding to the real line and Lebesgue measure on it was first raised by A Haar It was solved in a paper published in 1931 102 by J von Neumann who established the existence of a lifting in this case In subsequent papers J von Neumann and M H Stone 105 and later on J Dieudonne 22 discussed various algebraic aspects and generalizations of the problem Attempts to solve the problem as to whether or not there exists a lifting for an arbitrary M_t space were unsuccessful for a long time although the problem had significant connections with other branches of mathematics Finally in a paper published in 1958 88 D Maharam established by a delicate argument that a lifting of M_t always exists for an arbitrary space of a finite mass D Maharam proved first the existence of a lifting of the M_t space corresponding to a product $X = \prod_{i \in I} X_i$ and a product measure $\mu = \prod_{i \in I} \mu_i$ with μ_i a σ -finite measure for all $i \in I$ Then she reduced the general case to this one via an isomorphism theorem concerning homogeneous measure algebras 87 88 A different and more direct proof of the existence of a lifting was subsequently given by the authors in 65 A variant of this proof is presented in chapter 4
