Sustainable Practices in the Fashion and Retail Industry Tarnanidis, Theodore, Papachristou, Evridiki, Karypidis, Michail, Manda, Vijaya Kittu, 2025-03-07 Sustainable shopping practices are becoming more prevalent in the fashion and retail industry as consumers demand more ethical and environmentally friendly products. The industry's negative environmental and social impacts are being reduced through these efforts which often create high levels of waste, pollution, and exploitation. Technological advancements, shifting values, and changing economic and environmental conditions are shaping the future of consumer shopping habits. As the impact of consumers on society and the environment grows and digital innovations alter the way people interact with brands, the retail landscape is expected to change significantly. Further exploration of these sustainable practices may provide improved solutions for environmentally conscious fashion and retail businesses. *Sustainable Practices in the Fashion and Retail Industry* explores the continuing trends of sustainable techniques and practices in the fashion and retail business. It examines how consumer habits are evolving toward more thoughtful, personalized, and technology-driven experiences that align with modern values and lifestyles. This book covers topics such as green marketing, social media, and circular economy and is a useful resource for business owners, policymakers, entrepreneurs, economists, academicians, and researchers.

Sustainable Solutions for E-Waste and Development K. V., Rajesh Kumar, Kannan, Hemachandran, Spodarets, Dmitry, Khan, Parvez Alam, Pradhan, Bikash Kumar, 2024-02-07 The burden of global electronic waste or e-waste grows heavier by the day, demanding we take a closer look at the obscure hazards lurking within electronic devices. E-waste takes a calamitous toll on ecosystems and human well-being, necessitating immediate action. *Sustainable Solutions for E-Waste and Development* is an academic reference source that takes an incisive journey through the nexus of sustainable development and the surging menace of e-waste. In an age where our lives are orchestrated by gadgets, this book uncovers the profound repercussions that these marvels bear upon our environment, societies, and economies. As the dawn of an imperative revolution beckons, this book casts a discerning eye on unconventional strategies propelling readers into the realm of pioneering e-waste management, recycling ventures, and circular economy paradigms. It offers a panoramic view of policy blueprints and technological frontiers that could herald a future harmonizing technological progress with environmental sustainability. The book's compendium of recent research, revelations, exemplars, and best practices fosters an ecosystem of collaborative inquiry. Written and edited with the cognizance of the topic's wide audience, the book bridges academic rigor with accessible exposition. From scholars engrossed in environmental science, technology, and sustainable development to policymakers crafting the global legislative tapestry, this publication's relevance transcends boundaries.

Design and Assessment of Sustainable Products Magdalena Wojnarowska, Carlo Ingraio, 2024-12-30 This book questions the current definition of what makes a product sustainable and argues that a holistic approach to sustainable product design is required, one that considers all aspects of a product's life cycle from design to production to use and then

final disposal This edited collection introduces a new set of methods and tools aligned with the concept of comprehensive sustainable product design that integrates the environmental and social benefits of a product in line with the principles of a circular economy It provides a comprehensive understanding of the theoretical and practical framework that underpins a sustainable product highlighting the multiple key roles of eco design innovation quality and sustainability The authors describe the criteria for which products can be defined as being sustainable and outline how different manufacturing technologies influence the value of those products and the place they can find on the market accordingly The book's significant contribution lies in identifying the critical factors that are needed to successfully implement the framework throughout the entire life cycle of the product in a holistic integrated approach This book will be of interest for researchers and students studying sustainable product design environmental studies engineering and sustainable business management It will also be a useful resource for representatives of the business community managers technicians decision makers and consumers interested in sustainable product design issues

Eco-Innovation and Green Productivity for Sustainable Production and Consumption, 2nd edition Munir Ahmad, Cem Işık, Zeeshan Fareed, 2025-09-12 With the graduation of time the desire for enhanced production and consumption scales motivated the global economies to opt for the race to the bottom approach leading to environmental unsustainability On the one hand economies focused on escalated production levels proliferating non renewable energy consumption and reducing energy productivity leading to production based carbon dioxide CO₂ emissions On the other hand international trade of high CO₂ emissions embedded goods has skyrocketed the consumption based CO₂ emissions Since production and consumption based CO₂ emissions challenge environmental sustainability there is an urgent need to pursue sustainable production and consumption to realize the United Nations Sustainable Development Goals (SDGs) dream In this regard eco innovation came into play to transition the conventional production setup to a cleaner production mode Eco innovation involves all types of technological advancements extending contributions to the SDGs In this regard climate technologies and environmental technologies involving renewable energy e.g. wind solar biogas energy efficient technologies e.g. energy efficient electric appliances environmental pollution reduction technologies e.g. carbon scrubbing filters water purifiers waste mitigation technologies play a tremendous role in mitigating climatic adversities and environmental unsustainabilities By contributing to the responsible use of natural capital eco innovation facilitates efficient energy utilization improving energy productivity as well as environmental sustainability Moreover eco innovation has the inherent potential to aggravate sustainable production modes through green productivity a tool to enhance industrial outputs with fewer harms to the environment As a progressive move green productivity growth promotes a new trend of producing more economic output by consuming fewer resources and safeguarding ecosystems The mainstream empirical literature substantiated that eco innovation and green productivity remained critical players in limiting CO₂ emissions and promoting environmental sustainability Literature also witnessed that eco innovation ameliorated energy

productivity by motivating the countries to adopt cost saving and environmentally friendly technologies On the contrary the rebound effect supported the environmental deterioration impact of such technologies Against this backdrop this Research Topic will provide an opportunity to further delve into the influencing mechanisms triggered by eco innovation and green productivity growth on energy productivity and environmental sustainability for a futuristic perspective of sustainable production and consumption This Research Topic welcomes theoretical and empirical original research articles and reviews Research themes and areas include but are not limited to the following Links between eco innovation green productivity growth and energy productivity for sustainable production Climate technologies and carbon neutrality applications for sustainable production Firm level environment related innovation practices Renewable and energy efficient industrial transition for sustainable production Eco innovation through the firm life cycle for sustainable production and consumption Green innovation driven business models for sustainable production Climate technology driven policies for sustainable production and consumption Eco innovation and zero emissions agenda implementation Circular Economy and Re-Commerce in the Fashion Industry Shrivastava, Archana,Jain, Geetika,Paul, Justin,2020-06-19 The apparel industry has the scale reach and technical expertise to deliver on target sustainable development goals within the industry s sphere of influence in its interconnected global and local value chains From the farm to the consumer the textile retail and apparel production industry has an array of economic environmental social and governance impacts In order to meet sustainable goals the industry is challenged to buy and produce goods and services that do not harm the environment society and the economy Circular Economy and Re Commerce in the Fashion Industry is a pivotal reference source that explores and proposes solutions for best practices to meet sustainable development goals in the fashion industry and provides guidelines for assessing the technological landscape and modeling sustainable business practices Highlighting a wide range of topics including digital marking consumer behavior and social and legal perspectives this book is ideally designed for suppliers brand managers retailers multinational investors marketers executives designers manufacturers policymakers researchers academicians and students *OECD Public Governance Reviews Implementing the OECD Principles for Integrity in Public Procurement Progress since 2008* OECD,2013-11-21 This assessment of progress made in integrity in public procurement in OECD countries shows that as a result of austerity measures governments have been providing smarter and more environmentally friendly procurement **Effect of Eco-Friendly Products on Consumer Purchase Intention** Yusuf Balarabe Abdullahi,2021-12-28 Seminar paper from the year 2021 in the subject Communications Public Relations Advertising Marketing Social Media grade 3 8 Limkokwing University of Creative Technology language English abstract This study investigates the customers intention to pay the premium for green product rather than their purchase intention crosswise over various product classes It attempts to predict the factors that drive green purchase decisions and purchase intention Organized surveys are utilized for data accumulation and ordinary least square regression analysis of variance have

been utilized for analysis of information Results recommend the strength of customers discernment about the functional parts of green products on their purchase intention Extraordinary economic development activated by innovation revolution globalization has prompted market driven development in consumption pattern in the rising economies Change in consumption pattern has prompted overconsumption or unsustainable consumption and over abuse of assets In the present period the worry over environmental downturn decrease of environmental effect and practical development has turned into the topic of interest among the researchers academicians specialists and even industries Consumer research perceives that their observations for a product approach understanding about the product and its producer and different contextual factors assume a prevailing part in their decision making process Purchase intention which signifies the most extreme value that a consumer will pay for a specific or a heap of products play a conclusive influence on their decision behaviour Accordingly in the crossroads of environmental decay implementation of friendly environmental practices inclusive of green product consumption relies upon their tendency to pay the green value premium The present study endeavours to dissect the factors predicting consumers intention to pay the green value premium for products with green certification The environmentally feasible or environmental good or green products involves a rundown of potential advantages to the environment as they are made of environmental accommodating assets have asset preservation potential can be reused and have the least environmental effect at all phases of its lifecycle In section two a concise depiction of the constructs has been given trailed by research methodology in the third segment The analysis of information with the findings of the study and conclusion are exhibited in the fourth and fifth section The last segment gives the managerial ramifications of the study
