Techniques Of Ship Modelling:

Ship Modeling from Scratch: Tips and Techniques for Building Without Kits Edwin B. Leaf, 1993-10-22 Building a model from a kit is an excellent way to develop your modeling skills But once you've mastered the basics where do you go If you're looking for a challenge you move on to scratchbuilding And that can be imposing With a kit you worked with someone else's plans materials and building instructions Scratchbuilding makes you master of your own fate You do the research choose the subject the scale the material The choices are limited only by your enthusiasm Edwin B Leaf scratchbuilt his first model a Baltimore clipper nearly fifty years ago and he's been refining and building on his skills ever since In *Ship Modeling from Scratch* he lays out the principles from concept to construction to display on which scratchbuilding is based In clear concise language complemented by detailed illustrations he tells how to interpret existing drawings or create your own what materials to choose what tools to buy and what techniques to use to build everything from plank on frame plank on bulkhead or modern steel hulls to creating sharp and properly scaled details paint to portholes Building a model from scratch is a singular pursuit that requires patience confidence and ingenuity With *Ship Modeling from Scratch* open on your workbench you have your own private tutor guiding you through the trouble spots *Ship Modeling from Scratch* expands the horizon of any kit builder looking for a challenge including choosing the right subject finding and interpreting historical material building from plans drawing scaled plans from photographs buying tools and materials building everything from half models to plank on frame or plank on bulkhead versions of traditional sailing craft to modern steel cargo ships painting and displaying your model

The Techniques of Ship Modelling Gerald A. Wingrove, 1974 *Ship Modeling from Scratch: Tips and Techniques for Building Without Kits* Leaf, 1993-09

Ship Modeling Simplified: Tips and Techniques for Model Construction from Kits Frank Mastini, 1990-03-22 In *Ship Modeling Simplified* master model builder Frank Mastini puts to paper the methods he's developed over 30 years at the workbench to help novices take their first steps in an exciting pastime You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model What you need is an understanding coach Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting decorating and displaying finished models with patience and clarity not condescension He reveals dozens of shortcuts How to plank a hull egg shell tight how to build and rig complicated mast assemblies without profanity how to create sails that look like sails And along the way he points out things that beginners usually do wrong beforehand not after they've taken hammers to their projects *Ship Modeling Simplified* even includes an Italian English dictionary of nautical terms the key to assembling the many high quality Italian kits on the American market Model building is fun and not nearly as difficult as some experts would have you believe Here is everything you'll ever need to get started in a hobby that will last a lifetime
