**Encyclopedia of Sustainable Management** Samuel Idowu, René Schmidpeter, Nicholas Capaldi, Liangrong Zu, Mara Del Baldo, Rute Abreu, 2023-11-21 This encyclopedia is the most comprehensive and up to date source of reference for sustainability in business and management. It covers both traditional and emerging concepts and terms and is fully international in its scope. More than 700 contributions of internationally renowned experts provide a definitive access to the knowledge in the area of sustainable and responsible management. All actors in the field will find reliable and up to date definitions and explanations of the key terms and concepts of management in this reference work. The Encyclopedia of Sustainable Management represents all aspects of management and business conduct. It takes sustainability as a management concept that gives due credit to the complexity and diverging constraints in which businesses and corporations act today and it emphasizes and focuses approaches that help ensure that today's management decisions and actions will be the basis for tomorrow's prosperity.

[The Sustainability Handbook, Volume 2](#) Mark Von Rosing, 2025-06-27 The Sustainability Handbook provides a comprehensive and holistic understanding of sustainability bridging the gap between academic theory and business practices. Global climate change poses enormous environmental challenges and societies across the world must adapt and innovate to further the goals of sustainability for present and future generations. The private sector especially must find new ways of doing business to align their practices with the Sustainable Development Goals (SDGs) adopted by the international community. Using a conceptually structured framework throughout the book examines the latest academic research to summarize what environmental, social, and economic sustainability actually means in different contexts. Using numerous specific case studies and insights from industry leaders, the book shows how to strategically integrate sustainability into the organization with extensive focus on policies, incentives, measures, operations, production, consumption, and lifecycle management. Volume 2 explores the concept of Radical Sustainability within an enterprise and why it is needed. With examples from zero waste to eliminating use of rare earth resources, triggering sustainable practices to cause related marketing and sustainability responsibility to external transparency over internal incidents, this volume offers practical solutions for those who desire to progress from a Sustainable Strategy to an effective Sustainability Portfolio Management approach. Underpinned by international research based evidence, it explores associated trends and drivers within the marketplace and how innovative environmental, social, economic, and governance aspects can be considered and solutions applied. For researchers, students, and businesspeople at all levels and sectors, this handbook is an essential reference of the latest sustainability tools and methodologies required to adapt and innovate towards sustainability. Provides step by step guidance on key procedures and methodologies. Presents chapters that begin with a graphical representation of how the topic fits within the larger framework. Includes extensive coverage of sustainability related case studies and lessons learned.

**The Degrowth Economy. Strategic Path for Clothing Brands' Future and Empowerment Model for Fashion Consumers?** ,2021-08-23 Master s Thesis from the year 2021 in the subject Business economics Offline Marketing and Online Marketing grade 1 AMD Akademie Mode Design GmbH Fresenius University language English abstract This thesis aims to develop degrowth oriented business models for fashion brands that could not only bring competitive advantage to these organizations but also drive the achievement of the Sustainable Development Goals defined by the United Nations in 2015 The outcome of this thesis provides a range of design options and strategies that can be implemented by fashion brands in the degrowth framework combined within a custom buildable business model matrix An empirical research conducted with both qualitative and quantitative data assessed the developed business model matrix based on nine existing fashion organizations The results showed the existence of three observable business model archetypes presenting strong similarities with the proposed model however always limited to a very reductive approach of the degrowth economy The degrowth economy has long been undervalued by businesses considering prosperity without growth as an impossible match With the rising pressures imposed by climate change the new transformative challenges the fashion industry is facing and current shifts in consumers purchasing behaviors the degrowth economy debate appears as a relevant opportunity to initiate systemic change within the fashion industry This research highlights the need and relevance for the development of fashion business models using a more holistic approach of the degrowth economy now given possible thanks to the translation of degrowth concepts and ideas into implementable business strategies It suggests that fashion brands could get strong competitive advantages by following these recommendations and by acting as pioneers in a field that goes beyond the current understanding of sustainability in the fashion industry
