Using SPSS Syntax Jacqueline Collier,2009-10-21 SPSS syntax is the command language used by SPSS to carry out all

of its commands and functions In this book Jacqueline Collier introduces the use of syntax to those who have not used it before or who are taking their first steps in using syntax Without requiring any knowledge of programming the text outlines how to become familiar with the syntax commands how to create and manage the SPSS journal and syntax files and how to use them throughout the data entry management and analysis process Collier covers all aspects of data management from data entry through to data analysis including managing the errors and the error messages created by SPSS Syntax commands are clearly explained and the value of syntax is demonstrated through examples This book also supports the use of SPSS syntax alongside the usual button and menu driven graphical interface GIF using the two methods together in a complementary way The book is written in such a way as to enable you to pick and choose how much you rely on one method over the other encouraging you to use them side by side with a gradual increase in use of syntax as your knowledge skills and confidence develop This book is ideal for all those carrying out quantitative research in the health and social sciences who can benefit from SPSS syntax s capacity to save time reduce errors and allow a data audit trail

The Hunt for the Last Respondent Ineke A. L. Stoop,2005 Non response in sample surveys can have serious consequences on the accuracy of survey results This study shows how high response rates can be achieved even in the Netherlands a country notorious for its low response rates As an introduction an overview of groups that generally have low response rates and the possible causes of their lack of response is presented The emphasis is on non response bias that occurs when non response behavior and survey outcomes are correlated independent of background characteristics The Hunt for the Last Respondent will be of interest to survey methodologists market researchers survey sponsors and survey statisticians as well as anyone interested in survey quality
