It provides an accessible primer which will be used by students as a reference throughout their degree on all issues from research design to presentation. A unique feature of the book is that it provides definitions of terms from both human geography and physical geography. Organized into four parts: Getting Started in Geographical Research, Data Collection in Human Geography, Data Collection in Physical Geography, Analyzing and Representing Geographical Data. Each chapter is comprised of a short definition, a summary of the principal arguments, a substantive 5 000 word discussion, the use of real life examples and annotated notes for further reading. The teaching of research methods is integral in all geography courses. *Key Methods in Geography* identifies the key analytical and observational strategies with which all geography undergraduates should be conversant. Learning to Use Statistical Tests in Psychology Judith Greene, Manuela D'Oliveira, 1999. The second edition of this text is an introduction to the use of statistical tests in psychology experiments. Statistics without panic. Presented in a new textbook format its key objective is to enable students to select appropriate statistical tests to evaluate the significance of data obtained from psychological experiments. Improvements in the organization of chapters emphasize even more clearly the principle of introducing complex experimental designs on a need to know basis leaving more space for an extended interpretation of analysis of variance. In an important development for the second edition students are introduced to modern statistical packages as a useful tool for calculations, the emphasis being on understanding and interpretation. **Cumulated Index to the Books**, 1999 **Business Research** Dr. J.D. Wadate I Dr. Mukul Burghate, Research is a part of any systematic knowledge. It has occupied the realm of human understanding in some form or the other from times immemorial.
