Certainty Trap Ilana Redstone,2024-09-02 When we re in the Certainty Trap we tend to view people who disagree with us as hateful ignorant or just plain stupid When it comes to heated social and political issues in particular many of us know this feeling well a consuming state of righteous indignation and moral outrage And this response makes sense because our very certainty tells us that there are simple and obvious causes and solutions to the hot button issues we care about most But the things we care about the most are far more often than not morally and ethically complex If the problems that divide us are inherently complicated then a sense that the answers are obvious and that anyone who disagrees must be deficient in some way is misplaced It s an oversimplification that both leads to and reflects faulty thinking When we re certain we not only fail to recognize the possibility that we re wrong but also fail to be clear about the principles and values that drive our disagreement in the first place By committing to challenging and clarifying our thinking by avoiding the trap certainty sets for us we can increase social trust reduce political polarization and better address the world s pressing challenges **Spy's**
