International System of Typographic Picture Education Influenced by the progressive ideas of the Vienna Circle Isotype was intended to contribute to the democratization of knowledge To this end the Neuraths and their team created a special form of pictorial statistics that meant to make complex scientific relationships accessible to the layperson In the postwar period Marie Neurath developed several series of informative picturebooks for children that incorporated and further developed the Isotype principles Although these picturebooks were hugely successful in their time international picturebook research has barely acknowledged Marie Neurath s legacy This anthology is the first to elaborate Marie Neurath s achievement as a transformer of knowledge for children and to analyze her distinctive groundbreaking graphic method **Proceedings** ,1999
