was on track to meet its targets for recycling and for the sourcing of electricity from renewable sources but it performed less well than it had in 2006-07. It must improve the sustainability of its operations each year. The ease with which the Government continues to meet some targets even when its performance worsens indicates the urgent need for the Government to set itself more stringent targets. The Government should extend the system of targets and monitoring beyond central government and agencies to the wider public sector including its outsourced operations. The Government has the potential to drive change in the wider economy through sustainable procurement through investment in low carbon technologies and by driving the development of green skills in the workforce. But the Sustainable Development Commission found that Government performed poorly against its own targets. The Government must use its buying power to drive progress towards a greener economy. Many of the changes to the governance of Government's sustainable operations have been confusing or ineffective. The Government must ensure that there is a clear line of accountability for these matters and the Cabinet Office Minister responsible must take an active role in overseeing performance management. *Facts on Grants* Charles Stewart Mott Foundation, 2002.
