The Red Sea:

The Red Sea Alexis Wick, 2016-01-19 The Red Sea has from time immemorial been one of the world's most navigated spaces in the pursuit of trade pilgrimage and conquest Yet this multidimensional history remains largely unrevealed by its successive protagonists Intrigued by the absence of a holistic portrayal of this body of water and inspired by Fernand Braudel's famous work on the Mediterranean this book brings alive a dynamic Red Sea world across time revealing the particular features of a unique historical actor In capturing this heretofore lost space it also presents a critical conceptual history of the sea leading the reader into the heart of Eurocentrism The Sea it is shown is a vital element of the modern philosophy of history Alexis Wick is not satisfied with this inclusion of the Red Sea into history and attendant critique of Eurocentrism Contrapuntally he explores how the world and the sea were imagined differently before imperial European hegemony Searching for the lost space of Ottoman visions of the sea The Red Sea makes a deeper argument about the discipline of history and the historian's craft
