Ideas, Interests and the Development of the European Banking Systems Florian Bruggler,2020-08-17 What are the grand dynamics that drive the history of economies The laws of supply demand most economists would argue For the history of European banking this book offers an alternative explanation Rather than market forces the coincidence and coalitions of charismatic ideas and powerful interests is what shaped banking in Europe In *Ideas Interests and the Development of the European Banking Systems* Florian Bruggler traced decisive moments in the history of the European Banking Sector from the time of the Italian City States to the post World War I period he shows how coalitions of ideas and interests built the tracks along which the European Banking Sector developed Inspired by Max Weber he argues that economic organizations and institutions like the Banking Sector are embedded into three fundamental orders the economic the cultural and the political order Enforced and institutionalized by vested interests ideas of the cultural order legitimate and empower interests of the economic and political order What is more decisive moments were frequently characterized by coalitions of ideas and interests between parties that in normal times had nothing in common or were even confronting each other in a hostile way

The Single Currency and European Citizenship Giovanni Moro,2013-02-28 Established in 2002 the Euro is now the currency of 17 countries used by over 335 million people daily Although the single currency is much discussed in terms of macroeconomics and global finances policymakers rarely address its impact on European citizenship in social cultural political and everyday life economics terms This hidden side of the single currency is the focus of the essays which use various approaches from economic history and political sociology to citizenship and legitimacy to reveal the connections between the Euro and European citizenship This timely contribution by renowned experts provides a greater understanding of the Euro at a time when it is not clear whether it should be celebrated or commemorated and looks into aspects of the single currency that are the base of the social trust that supports it and that is at stake in the present crisis It will be an essential tool to anyone studying the political social and economic development of the E U

Images of Europe Francesco Mangiapane, Tiziana Migliore, 2021-05-20 This book deals with the fundamental semantics of images of Europe which consist of valences mirror beliefs and affectivities This is why it relaunches the importance of the European discourse in its symbolic dimension As such it explores the many images of Europe or rather the many images through which European discourse is actually constituted in daily life in search of their enunciative responsibility in today's world for determining the current State of the Union The identity of the European continent is based on a millenary tension between universalism and particularism images of Europe have in fact been alternately inspired over the centuries by a model of homogeneity Roman and Carolingian imperial disposition on the one hand and by a model of fragmentation a Europe of city states municipalities regions and small fatherlands on the other In the European Union a political and economic organism this issue has recently been amplified to the point that it has reentered public debate and political parties that are only recognizable for being Europeanists or anti Europeanists are now ubiquitous In this regard one major bone of contention is how to portray the quintessential aspects of the European territory which are either interpreted as thresholds to be overcome in the name of a model of United Europe integral totality or are instead regarded as insurmountable obstacles for a Europe that is irreparably and perhaps according to anti Europeanists fortunately fragmented partitive totality Further this is to be done without excluding the possibility of contradictory and complementary solutions to these binary visions In this context the book analyzes various texts in order to obtain a more precise picture of the clash reveal its semiotic forms and by doing so identify a way out of the crisis

Conley, Donatienne Ruy, 2018-09-15 In recent years Europe has seen its largest influx of migrants and refugees in decades with 1.9 million arrivals to the continent between 2014 and 2017 Peak arrivals in 2015 and sustained flows since then have found the European Union and its 28 member states unable to face what has been called the European migration crisis Part of their response has focused on cooperation with third countries of transit or origin by

leveraging development humanitarian and foreign policy tools to try and reduce migrant flows to Europe including through many funding and budgetary decisions This report attempts to quantify through budgetary analysis what shifts occurred in the external dimension of Europe s migration policy following the crisis and in three member states Germany Sweden and the Netherlands These short term shifts representing policy priorities carry long term consequences for the European Union s role as a foreign policy and soft power actor
