Psychology and Moral Theology Bartholomew M. Kiely,1980 The Literary News ,1885 **Reflections on Religious Literacy** Leo Van Arragon,2026-01-23 Sometimes a conundrum creates opportunity to go back to basics This book was inspired by productive irritation arising from a conundrum at the intersection of three worlds Van Arragon inhabits each of which holds assumptions about religion and religious literacy The author s personal world professional life as an educator in a Christian school system and the academic world he entered after retirement all worked with ideas about religion including what it is and its purposes in individual and collective lives Though each assumes its ideas are true these worlds live in creative tension with each other Even though people are obsessed with religion in this secular age we don t know what to do

with it and it lives on the margins of educational respectability Readers can join Van Arragon on a trip to resolve key questions of this conundrum What is religion What are objections to religion that marginalize it in education What is literacy What is religious literacy and why is it essential for students The author argues that religion is a foundational human capacity that equips us to ask big questions of meaning and destiny fundamental to education Religious literacy equips students to successfully navigate their worlds and their own spirit quests and is an essential component of critical thinking Literary Bulletin ,1885

Hidden Memories Robert A. Baker,1996-09 Alien abductions satanic kidnappings the channeling of spirits the recall of past lives and other similar bizarre experiences are reported almost daily in the media Is there a rational explanation for these events According to Robert A Baker such irregular or supernatural experiences are manifestations of hidden memories a phenomenon in which experiences that originally make little conscious impression are filed away in the brain and later are suddenly remembered in an altered form In *Hidden Memories* the most recent scientific evidence on memory is used to dispel many supernatural beliefs and to show how the boundaries of human behavior are often misperceived by therapists especially those who adhere to fringe beliefs He shows how delusions and illusions affect behavior and discusses the role hypnosis imagination and suggestion play in the creation of other worldly experiences Finally Baker looks at the media s role in aiding and abetting paranormal belief in addition to promoting the
