The Design Of Interior Circulation People And Buildings

RD Boyd

The Design Of Interior Circulation People And Buildings:

The Design of Interior Circulation Peter Tregenza,1976 Elevator Traffic Handbook Gina Barney,Lutfi Al-Sharif,2015-08-27 This second edition of this well respected book covers all aspects of the traffic design and control of vertical transportation systems in buildings making it an essential reference for vertical transportation engineers other members of the design team and researchers The book introduces the basic principles of circulation outlines traffic design methods and examines and analyses traffic control using worked examples and case studies to illustrate key points The latest analysis techniques are set out and the book is up to date with current technology A unique and well established book this much needed new edition features extensive updates to technology and practice drawing on the latest international research

Companion to Contemporary Architectural Thought Ben Farmer,Dr Hentie J Louw,Hentie Louw,Adrian Napper,2003-09-02 Architecture has attracted increasing worldwide attention in recent years not only because of its cultural significance but also because of concern over the performance and resource implications of buildings 101 in depth articles by international scholars and practitioners bring the subject into focus by examining issues from various viewpoints Please contact your representative for a leaflet detailing full contents and contributors It also includes sample pages and several illustrations from the book Metric Handbook David Adler,2007-06-07 Originally devised as a guide for converting from imperial to metric measurements The Metric Handbook has since been totally transformed into a major international handbook of planning and design data The second edition has been completely updated with most chapters being totally rewritten to meet the needs of the modern designer The book contains nearly 50 chapters dealing with all the principal building types from airports factories and warehouses offices shops and hospitals to schools religious buildings and libraries For each building type The Metric Handbook gives the basic design requirements and all the principal dimensional data Several chapters deal with general aspects of building such as materials lighting acoustics and tropical design There are also sections on general design data including details of human dimensions and space requirements It is a unique authoritative reference for solving everyday planning problems In its various editions it has sold over 100 000 copies worldwide and continues to be a reference work belonging on every design office desk or drawing board Elevator Traffic Handbook Gina Carol Barney,2003 The practical constraints and considerations of the underlying engineering are also indicated BOOK JACKET **Proceedings of the Institution of Civil Engineers** ,2005 **Journal of Architectural and Planning Research** ,1984 **The Indian Architect** Dwarka Nath Dhar,1976 Architectural Science Review ,1998 *Library of Congress Catalogs* Library of Congress,1979 **Subject Catalog** Library of Congress,1977 **Catalogue** Harvard University. Designing Commercial Interiors Christine M. Piotrowski,Elizabeth A. Rogers, IIDA,2010-01-26 The definitive reference on designing commercial interiors expanded and updated for today s facilities Following the success of the ASID

Polsky Prize Honorable Mention in 1999 authors Christine Piotrowski and Elizabeth Rogers have extensively revised this guide to planning and designing commercial interiors to help professionals and design students successfully address today's trends and project requirements. This comprehensive reference covers the practical and aesthetic issues that distinguish commercial interiors. There is new information on sustainable design, security, and accessibility, three areas of increased emphasis in modern interiors. An introductory chapter provides an overview of commercial interior design and the challenges and rewards of working in the field and stresses the importance of understanding the basic purpose and functions of the client's business as a prerequisite to designing interiors. This guide also gives the reader a head start with eight self-contained chapters that provide comprehensive coverage of interior design for specific types of commercial facilities ranging from offices to food and beverage facilities and from retail stores to health care facilities. Each chapter is complete with a historical overview, types of facilities, planning and interior design elements, design applications, a summary, references, and Web sites. New design applications covered include spas in hotels, bed and breakfast inns, coffee shops, gift stores, and salons, courthouses and courtrooms, and golf clubhouses. In keeping with the times, there are new chapters focusing on senior living facilities and on restoration and adaptive use. A chapter on project management has been revised and includes everything from proposals and contracts to scheduling and documentation. Throughout the book, design application discussions, illustrations, and photographs help both professionals and students solve problems and envision and implement distinctive designs for commercial interiors. With information on licensing codes and regulations along with more than 150 photographs and illustrations, this combined resource and instant reference is a must-have for commercial interior design professionals, students, and those studying for the NCIDQ licensing exam.
